Place In Literature Regions Cultures Communities:

Place in Literature Roberto Maria Dainotto, 2000 Since the 1840s when Victorian England emerged into the modern era and industrial cities became the new cultural centers regionalist literature has posited itself as an aesthetic alternative to nationalist culture Yet what differentiates regionalism s claims of authenticity derived from blood and soil from those of nationalism Through close readings and theoretical elaborations Roberto M Dainotto reveals the degree to which regionalism mimics nationalism in valorizing ethnic purity He interprets regionalism not as a genre in the pastoral tradition but as a rhetorical trope a way of reading in which regionalism figures as the other against a historical process that disrupts the organic wholeness of place Dainotto traces the genealogy of the idea of place in literature examining European texts from Victorian England to Fascist Italy He finds for example in Thomas Hardy's The Return of the Native a virtual thesaurus of regionalist commonplaces Elizabeth Gaskell s North and South mediates between Madame de Stal s privileging of the sophisticated north and Jean Jacques Rousseau's nostalgia for the naive south The regionalism of the Sicilian philosopher Giovanni Gentile exhibits a deep longing for the humanities as they define Italy and Western culture Dainotto concludes with a close look at the rhetoric of Nazism and Fascism dramatizing the convergence of regionalist aesthetics and nationalist ideology in Italy and Germany between the two World Wars Gender and Space in British Literature, 1660-1820 Mona Narain, Karen Gevirtz, 2016-04-15 Between 1660 and 1820 Great Britain experienced significant structural transformations in class politics economy print and writing that produced new and varied spaces and with them new and reconfigured concepts of gender In mapping the relationship between gender and space in British literature of the period this collection defines charts and explores new cartographies both geographic and figurative The contributors take up a variety of genres and discursive frameworks from this period including poetry the early novel letters and laboratory notebooks written by authors ranging from Aphra Behn Hortense Mancini and Isaac Newton to Frances Burney and Germaine de Stal Arranged in three groups Inside Outside and Borderlands the essays conduct targeted literary analysis and explore the changing relationship between gender and different kinds of spaces in the long eighteenth century In addition a set of essays on Charlotte Smith's novels and a set of essays on natural philosophy offer case studies for exploring issues of gender and space within larger fields such as an author's oeuvre or a particular discourse Taken together the essays demonstrate space s agency as a complement to historical change as they explore how literature delineates the gendered redefinition occupation negotiation inscription and creation of new spaces crucially contributing to the construction of new cartographies in eighteenth and early nineteenth century England Reanimating Regions James Riding, Martin Jones, 2017-05-12 Writing regions undertaking a regional study was once a standard form of geographic communication and critique This was until the quantitative revolution in the middle of the previous century and more definitively the critical turn in human geography towards the end of the twentieth century From then on writing regions as they were experienced

phenomenologically or arguing culturally historically and politically with regions was deemed to be old fashioned Yet the region is and always will be a central geographical concept and thinking about regions can tell us a lot about the history of the discipline called geography Despite taking up an identifiable place within the geographical imagination in scholarship and beyond region remains a relatively forgotten under used and in part under theorised term Reanimating Regions marks the continued reinvigoration of a set of disciplinary debates surrounding regions the regional and regional geography Across 18 chapters from international interdisciplinary scholars this book writes and performs region as a temporary permanence something held stable not fixed and absolute at different points in time for different purposes There is as this expansive volume outlines no single reading of a region Reanimating Regions collectively rebalances the region within geography and geographical thought In renewing the geography of regions as not only a site of investigation but also as an analytical framework through which to write the world what emerges is a powerful reworking of the geographic imagination Read against one another the chapters weave together timely commentaries on region and regions across the globe with a particular emphasis upon the regional as played out in the United Kingdom and regional worlds both within and beyond Europe offering chapters from Africa and South America Addressing both the political and the cultural this volume responds to the need for a consolidated and considered reflection on region the regional and regional geography speaking directly to broader intellectual concerns with performance aesthetics identity mobilities the environment and the body

Regional Romanticism Gerard Lee McKeever, 2024-10-22 This book tracks the rise of modern cultural regionalism across the turn of the nineteenth century Attending specifically to literature and literary culture it examines how a particular region southwest Scotland was reimagined between 1770 and 1830 Regionalisms were a vital emergent force in this period in dialogue with the local the national the transnational and the imperial In the case of southwest Scotland the literary inscription of the region was generated in a blossoming periodical press by visitors like Dorothy Wordsworth and John Keats

by resident icon Robert Burns by homesick emigrants such as Allan Cunningham by adventurers colonialists and pirates looking back from within and beyond the formal limits of empire by the unprecedented success of Walter Scott and by many others navigating the opportunities presented by rapidly evolving economic environmental and infrastructural conditions Regional Romanticism illuminates a neglected aspect of anglophone literary history acknowledging regions and regionalism as a primary frame of reference in late eighteenth and early nineteenth century culture From Popular Liberalism to National Socialism Oded Heilbronner, 2017-05-15 Long live liberty equality fraternity and dynamite So went the traditional slogan of the radical liberals in Greater Swabia the south western part of modern Germany This book investigates the development of what the author terms popular liberalism in this region in order to present a more nuanced understanding of political and cultural patterns in Germany up to the early 1930s In particular the author offers an explanation for the success of National Socialism before 1933 in certain regions of South Germany arguing that the radical liberal sub culture was not subsumed by the Nazi Party but instead changed its form of representation Together with the famous v lkish fraction and the leftist fraction within the chapters of the Nazi Party there were radical liberal associations ex members of radical liberal parties sympathizers with these parties and notables with a radical orientation derived from family and regional traditions These people and associations believed that the Nazi Party could fulfil their radical liberal vision rooted in the local democratic and liberal traditions which stretched from 1848 to the early 20th century By looking afresh at the relationship between local regional identities and national politics this book makes a major contribution to the study of the roots of Invented Traditions and Regional Identities --- a Study of the Cultural Formations of South India ---Nazism Place, Culture and Community Johanne Devlin Trew, 2009 The Ottawa Valley **1856-1990s** Krishna K.
