Die rechtliche Zulässigkeit von Placebokontrollgruppen in Arzneimittelstudien Franziska B. Friske, 2017 Clinical trials of medicinal products on human subjects are a balancing act between the protection of the study participant and the preservation of his dignity on the one hand and the constant striving for medical progress on the other hand This applies likewise to the control group as an essential part of every clinical testing of pharmaceuticals without which no drug will receive marketing authorisation in Germany by the competent authorities Nevertheless significant gaps in the German legislation concerning this matter still remain as the German legislator has yet to implement any specific rules with regard to the handling and management of the control group in clinical trials In view of this unsettled legal situation the author critically analyses the core of the problem areas in this field's current research practice and creates solutions reflecting the interests of the study participant as well as the practical needs of medical research Only legal clarity regarding the control group can provide for the safety that is crucial in this field of tension between ethics medicine and the law

Corinna Bath, 2005 Technoscience transformiert sowohl Technologien als auch herkömmliche Körperkonzepte. Dabei entstehen dynamische Verkörperungen. Diese faszinieren die wissenschaftliche Beobachtung und provozieren disziplinenbergreifend grundlegende Fragen. Der Band konturiert solche neuen Forschungsfronten. Er reflektiert Erweiterungen des Körperbegriffs und gibt Einsichten in die komplexe aber produktive Verwobenheit von Diskursen und Technologien, die aus dem wissenschaftlichen Transfer von Leitbildern zwischen Naturwissenschaften und Kulturwissenschaften resultieren.
