**Thoreaus Sense of Place** Richard J. Schneider, 2000-05 Recent Thoreau studies have shifted to an emphasis on the green Thoreau on Thoreau the environmentalist rooted firmly in particular places and interacting with particular objects In the wake of Buell s *Environmental Imagination* the nineteen essayists in this challenging volume address the central questions in Thoreau studies today how green how immersed in a sense of place was Thoreau really and how has this sense of place affected the tradition of nature writing in America The contributors to this stimulating collection address the ways in which Thoreau and his successors attempt to cope with the basic epistemological split between perceiver and place inherent in writing about nature related discussions involve the kinds of discourse most effective for writing about place They focus on the impact on Thoreau and his successors of culturally constructed assumptions deriving from science politics race gender history and literary conventions Finally they explore the implications surrounding a writer s appropriation or even exploitation of places and objects

Humanity's relationship with the natural world is one of the oldest and newest topics in human history. The issue emerged as a distinct field of scholarship in the early 1970s and has been growing steadily ever since. The discipline's territory and sources are rich and varied and include climatic and geological data, court records, archaeological digs, and the writings of naturalists as well as federal and state economic and resource development and conservation policy. Environmental historians investigate how and why natural and human created surroundings affect a society's development. Merchant provides a context setting overview of American environmental history from the precolonial land use practice of Native Americans and concluding with twenty first concerns over global warming. The book also includes a glossary of important concepts, people, agencies, and legislation, a chronology of major events, and an extensive bibliography including films, videos, CD-ROMs, and websites. This concise reference for students and general readers contains an accessible overview of American environmental history, a mini encyclopedia of ideas, people, legislation, and agencies, a chronology of events and their significance, and a bibliography of books, magazines, and journals as well as films, videos, CD-ROMs, and online resources. In addition to providing a wealth of factual information, *The Columbia Guide to American Environmental History* explores contentious issues in this much debated field from the idea of wilderness to global warming. **Book Review Digest**, 2000 **Rooted** David R. Pichaske, 2009-05 David Pichaske has been writing and teaching about midwestern literature for three decades. In *Rooted*, by paying close attention to text, landscape, and biography, he examines the relationship between place and art. His focus is on seven midwestern authors who came of age toward the close of the twentieth century: their lives and their work grounded in distinct places. Dave Etter in small town upstate Illinois, Norbert Blei in Door County, Wisconsin, William Kloefkorn in southern Kansas and Nebraska, Bill Holm in Minnesota, Linda Hasselstrom in Hermosa, South Dakota, Jim Heynen in Sioux County, Iowa, and Jim Harrison in upper Michigan. The writers' intimate knowledge of place is reflected in their use of details of geography, language, environment, and behavior. Yet each writer reaches toward other geographies and into other dimensions of art or thought: jazz music and formalism in the case of Etter, gender issues in the case of Hasselstrom, time past and present in the case of Kloefkorn, ethnicity and the role of the artist in the case of Blei, magical realism in the case of Heynen, the landscape of literature in the case of Holm, and the curious worlds of academia, best selling novels, and Hollywood films in the case of Harrison. The result, Pichaske notes, is the growing away from roots, the explorations and alter egos of these writers of place and the tension between the here and there that gives each writer's art the complexity it needs to transcend provincial boundaries. Quoting generously from the writers, Pichaske employs a practical, jargon-free literary analysis, fixed in the text, making *Rooted* interesting, readable, and especially useful in treating the literary categories of memoir and literary essay that have become important in recent decades.
