**Beyond the Solar System** Satoshi Matsushima, 1964 **Pluto and Charon** Alan Stern, David James Tholen, 1997-12 For five decades after its discovery in 1930 the planet Pluto remained an enigma However several events during the last two decades have helped to lift the veil of mystery surrounding the ninth planet The discovery of its satellite Charon in 1978 permitted occultation observations that allowed scientists to determine the size of both bodies Astronomers also detected the presence of an atmosphere and the Hubble Space Telescope provided views in unprecedented detail In addition to these two fortuitous events advances in telescopic instrumentation and computational methods led to exciting observational and theoretical discoveries This new Space Sciences Series volume focuses on the scientific issues associated with Pluto and Charon Fifty collaborating authors here review the latest research on the Pluto Charon binary from bulk properties surfaces and interiors to atmospheric structure composition and dynamics They also provide historical perspectives on Pluto Charon research and discuss the population of the trans Neptunian region and the origin of the Pluto Charon binary Also included are prefatory remarks by Pluto's and Charon's discoverers Clyde Tombaugh and James Christy This volume offers the most comprehensive available compendium of research work for understanding these far off members of our solar system just at a time following dramatic developments in our knowledge but before that knowledge can be advanced by spacecraft missions

*The Exoplanet Handbook* Michael Perryman, 2018-08-30 With the discovery of planets beyond our solar system 25 years ago exoplanet research has expanded dramatically with new state of the art ground based and space based missions dedicated to their discovery and characterisation With more than 3 500 exoplanets now known the complexity of the discovery techniques observations and physical characterisation have grown exponentially This Handbook ties all these avenues of research together across a broad range of exoplanet science Planet formation exoplanet interiors and

atmospheres and habitability are discussed providing in depth coverage of our knowledge to date Comprehensively updated from the first edition it includes instrumental and observational developments in depth treatment of the new Kepler mission results and hot Jupiter atmospheric studies and major updates on models of exoplanet formation With extensive references to the research literature and appendices covering all individual exoplanet discoveries it is a valuable reference to this exciting field for both incoming and established researchers
