Robots What They Are What They Do:

Robots Fredericka Berger,1992 Examines different kinds of robots what they do and how they work , *Nexi Robot*, The Toney Allman,2009-07-15 Nexi is one of a team of four small humanoid robots that have mobility dexterity and social communication skills Every great invention begins with a great idea Read all the books in this series and learn about the history and impact of some of the most fascinating innovations and inventions of our time Explore the idea s early stages of development problems encountered along the way and how each great idea has influenced our lives From popular culture and the environment to life saving machines learn about the ideas people and technologies that made it all happen This series correlates with The Science Technology Engineering and Math S T E M curriculum initiative **ECAI 2006** Silvia Coradeschi,Anna Perini,Paolo Traverso,2006-08-15 In the summer of 1956 John McCarthy organized the famous Dartmouth Conference which is now commonly viewed as the founding event for the field of Artificial Intelligence During the last 50 years AI has seen a tremendous development and is now a well established scientific discipline all over the world Also in Europe AI is in excellent shape as witnessed by the large number of high quality papers in this publication In comparison with ECAI 2004 there s a strong increase in the relative number of submissions from Distributed AI Agents and Cognitive Modelling Knowledge Representation Reasoning is traditionally strong in Europe and remains the biggest area of ECAI 06 One reason the figures for Case Based Reasoning are rather low is that much of the high quality work in this area has found its way into prestigious applications and is thus represented under the heading of PAIS **Robotics and the Factory of the Future** ,1983 Future Robots Domenico Parisi,2014-06-15 This book is for both robot builders and scientists who study human behaviour and human societies Scientists do not only collect empirical data but they also formulate theories to explain the data Theories of human behaviour and human societies are traditionally expressed in words but today with the advent of the computer they can also be expressed by constructing computer based artefacts If the artefacts do what human beings do the theory blueprint that has been used to construct the artefacts explains human behaviour and human societies Since human beings are primarily bodies the artefacts must be robots and human robots must progressively reproduce all we know about human beings and their societies And although they are purely scientific tools they can have one very important practical application helping human beings to better understand the many difficult problems they face today and will face in the future and perhaps to find solutions for these problems **Usurpation** Sue Burke,2024-10-29 After her rollicking standalone *Dual Memory* Sue Burke returns to her *Semiosis* series and the world of Pax in *Usurpation* which combines the thrill of M Night Shyamalan s *The Happening* with the eco empowerment of VanderMeer s *Dead Astronauts* Stevland the dominant sentient lifeform of Pax has clandestinely sent some of its progeny to Earth To explore to spread to report back Since their germination Earth has been a powder keg Human rebellion robot uprisings and global pandemics have created chaos distrust and deaths As more and more conflicts break out across Earth Stevland s children work in the background in
