Secondary Instructional Methods:

Instructional Methods for Secondary Students with Learning and Behavior Problems Patrick J. Schloss, Maureen A. Smith, Cynthia N. Schloss, 2001 This book presents teaching principles useful to general high school educators and special educators working with students demonstrating a variety of academic behavioral and social needs in secondary schools

Instructional Methods for Adolescents with Learning and Behavior Problems continues to fill a void in the textbook arena by presenting a comprehensive package of teaching techniques useful in helping secondary special educators develop and implement instruction that is appropriate for all students The diversity of the needs of secondary students with disabilities and the challenge of providing appropriate educational services in general education settings places unique demands on students and their teachers and this text provides much needed information and support

Effective Instructional Strategies Kenneth D. Moore, 2009 Applying the latest research findings and practical classroom practices this book provides thorough coverage of the strategies and skills needed for effective teaching

Targeted Teaching Tremaine Baker, Gareth Evers, Richard Brock, 2017-02-09 There is no single best approach in teaching This new text challenges the idea that there is a best way to teach Instead the authors explain a more pragmatic approach is required Teachers need a range of skills and strategies to select from work with and adapt Every school cohort class and child is different Beyond that strategies that worked well with a class one week may prove ineffective the next This book presents a range of strategies well grounded in research for trainees and beginning teachers to use in their own classroom settings and contexts presents a model of teaching that views teaching not as a profession in which there is always a single correct answer but as a complex interaction between teacher and students addresses common issues that beginning teachers face when developing their practice If you are a teacher wanting to find out what works best for your class in your school right now this text will show you how to harness the power of small or large scale research to help you find the answer
