Eisenhardt, 2015 Outlines an approach to high performance problem solving and decision making that draws on insights from survival guides pop culture and other sources      **Your Brain Is Playing Tricks On You** Albert Moukheiber, 2024-07-23 Why are we often convinced that we re right even when we re wrong Why are we jealous or paranoid even when we have absolutely no reason to be Why is it so easy for fake news to spread around the globe and fool us It s

because we don't see the world as it is rather we reconstruct it in our mind. Reality is way too complex and multiple to be apprehended by our capacities of attention which are quite limited as well as our brain abilities. That is why our perception of the world is subjective and various elements influence the way we acquire knowledge and form opinions. Our brain is recreating the world in its own way most of the time for our own good. How hard would it be if before making a choice we had to know about all the options available in a given situation? It would take us forever to choose an item of clothing in a store or a meal in a restaurant. Luckily our brain can estimate even if it makes us imperfect and subject to illusion, delusion and error. It allows us to reconstruct the world as we know it and live in it. However, these very useful mechanisms can sometimes mislead us and have a rather negative impact on our actions, beliefs and opinions when our brain behaves that way. We say it is biased. Albert Moukheiber gives us tips and tricks to fight against these cognitive biases, the first one being not to trust ourselves too much and to always doubt our thinking processes, especially in this era where social networks spread information like an epidemic. In this book filled with multiple examples from our daily lives and psychosocial experiments, Moukheiber explores the building blocks of our perception, cognition and behaviour which are involved in acquiring knowledge or forming opinions. Dr Albert Moukheiber is a neuroscientist and clinical psychologist. He has worked for 10 years in the psychiatry department at the Hôpital Pitié Salpêtrière focusing mainly on anxiety disorders and resilience. He now works as a clinician at his practice and teaches at the University Paris 8 in the clinical psychology department. He has also founded Chiasma, a structure that is interested in how our brain reconstructs reality to confirm our prior beliefs and how to promote mental flexibility. Chiasma focuses on how we form opinions and the impact of these mechanisms on our decision making. Albert is also a lecturer and a lead workshop developer for businesses and shares the latest scientific discoveries on behaviour and cognition and how they impact our daily lives.
