Sensors and Microsystems Piero Malcovati,Andrea Baschiroto,Arnaldo d'Amico,Corrado Natale Di,2010-03-14 *Sensors and Microsystems* contains a selection of papers presented at the 14th Italian conference on sensors and microsystems It provides a unique perspective on the research and development of sensors microsystems and related technologies in Italy The scientific values of the papers also offers an invaluable source to analysts intending to survey the Italian situation about sensors and microsystems In an interdisciplinary approach many aspects of the disciplines are covered ranging from materials science chemistry applied physics electronic engineering and biotechnologies Further details of the conference and its full program at the website <http://www.microelectronicsevents.com/AISEM> *Advanced Holography* Izabela Naydenova,2011-11-09 *Advanced Holography Metrology and Imaging* covers digital holographic microscopy and interferometry including interferometry in the infra red Other topics include synthetic imaging the use of reflective spatial light modulators for writing dynamic holograms and image display using holographic screens Holography is discussed as a vehicle for artistic expression and the use of software for the acquisition of skills in optics and holography is also presented Each chapter provides a comprehensive introduction to a specific topic with a survey of developments to date

Interferometry in Speckle Light P. Jacquot,J.-M. Fournier,2012-02-02 These proceedings reflect the work presented at the conference *Interferometry in Speckle Light Theory and Applications* held at the Ecole Polytechnique Federale de Lausanne EPFL the Swiss Federal Institute of Technology in Lausanne Switzerland The event took place from September 25 to September 28 2000 Thanks to the diligence of the authors this book has been published just in time for the conference Writing this preface in July in anticipation of the conference we have tried to envisage how this book will benefit the quality of discourse between authors and attendees *Interferometry in Speckle Light Theory and Applications* results from a bottom up approach and is original in several ways This conference is not part of a series on the contrary it is a single event The idea of gathering scientists and engineers for a general discussion on the theory and the practice of interferometry involving

rough non optically polished objects was in the air An opportunity of this sort was not provided by any of the conferences scheduled when the present one was conceived For this reason it was easy to convince a small number of renowned researchers all of them active in the field of holographic and speckle interferometry to organize a conference To be specific they are the people listed below as members of the scientific and local committees At the same time a particular circumstance namely the retirement of Professor L Pflug helped to detennine the location of the meeting *Holographic Materials* ,2002 *Practical Holography* ,2002 **Bulletin of the Institution of Engineers (India)**.
