Human Nature and the Limits of Science John Dupré, 2001-11-08

John Dupré warns that our understanding of human nature is being distorted by two faulty and harmful forms of pseudo scientific thinking. Not just in the academic world but increasingly in everyday life, we find one set of experts seeking to explain the ends at which humans aim in terms of evolutionary theory, and another set of experts using economic models to give rules of how we act to achieve those ends. Dupré charges this unholy alliance of evolutionary psychologists and rational choice theorists with scientific imperialism: they use methods and ideas developed for one domain of inquiry in others where they are inappropriate. He demonstrates that these theorists' explanations do not work, and furthermore that if taken seriously, their theories tend to have dangerous social and political consequences. For these reasons, it is important to resist

scientism an exaggerated conception of what science can be expected to do for us To say this is in no way to be against science just against bad science Dupr restores sanity to the study of human nature by pointing the way to a proper understanding of humans in the societies that are our natural and necessary environments He shows how our distinctively human capacities are shaped by the social contexts in which we are embedded And he concludes with a bold challenge to one of the intellectual touchstones of modern science the idea of the universe as causally complete and deterministic In an impressive rehabilitation of the idea of free human agency he argues that far from being helpless cogs in a mechanistic universe humans are rare concentrations of causal power in a largely indeterministic world Human Nature and the Limits of Science is a provocative witty and persuasive corrective to scientism In its place Dupr commends a pluralistic approach to science as the appropriate way to investigate a universe that is not unified in form Anyone interested in science and human nature will enjoy this book unless they are its targets

Equality of Opportunity for Sexual and Gender Minorities

John Arzinos, Christian De la Medina Soto, Clifton Cortez, 2021-12-02 Despite legal and social advances in the past two decades sexual and gender minorities continue to face widespread discrimination and violence in many countries This discrimination and violence lead to exclusion which adversely impacts their lives as well as the communities and economies in which they live A major barrier to addressing this stigma and sexual orientation and gender identity SOGI based exclusion is the lack of SOGI specific data Robust quantitative data on differential development experiences and outcomes of sexual and gender minorities especially those in developing countries is extremely thin This paucity of data jeopardizes the achievement of the Sustainable Development Goals and countries commitment to the principle of leaving no one behind in the effort to end poverty and inequality Equality of Opportunity for Sexual and Gender Minorities assesses the unique challenges that sexual and gender minorities face in six important areas i Criminalization and SOGI ii Access to education iii Access to the labor market iv Access to public services and social protection v Civil and political inclusion vi Protection from hate crimes This report covers numerous policy recommendations to prevent and eliminate discriminatory practices in all of the areas covered It also seeks to influence legislative changes and support research on institutions and regulations that can ultimately lead to poverty reduction and shared prosperity At the same time it acknowledges that the mere existence of inclusive laws and regulations does not ensure that sexual and gender minorities are free from discrimination the enforcement of those laws is crucial This publication the first in a series of studies will be expanded from the 16 countries included here to a wider set of countries for more in depth quantitative analysis and to identify possible correlations with socioeconomic outcomes It will seek to deepen knowledge facilitate peer learning of good practices and encourage reforms to increase the inclusion of sexual and gender minorities
