Politics And Progress The Emergence Of American Political Science:

Politics and Progress Dennis J. Mahoney, 2004 Mahoney describes the emergence of American political science as a separate academic discipline in the era between the Civil War and the First World War with the pivotal event of the founding of the American Political Science Association in 1903 His book a testament to the integrity of American political science chronicles its intellectual and cultural development *The Politics of Development* Claire Mcloughlin, Sameen Ali, Kailing Xie, Nic Cheeseman, David E. Hudson, 2024-03-06 A pathbreaking introduction to the controversial contested and deeply political topic of development Written in an engaging and eminently readable style leading authors invite readers to examine the political dynamics behind some of today s most complex global issues from rising inequality and social exclusion to the climate crisis By confronting false assumptions and dispelling myths the book challenges readers to see politics as not only the obstacle to development but also the means to achieve it The Politics of Development is grounded in the everyday challenges facing people around the world in accessing the vital resources they need to survive and thrive It illustrates the unavoidable reality that politics shapes who gets what when how whether in family settings local communities national stages or global arenas It provides readers with a clear roadmap for action centred on institutions interests and ideas to better navigate competing demands and push forward profound change There are no easy answers to the politics of development instead this book provides the analytical tools to understand why getting development right can be so hard and how you can positively respond to some of the critical challenges facing governments societies and citizens around the world today This text is essential reading for any student of the politics of development or Development Studies at undergraduate and postgraduate levels Claire Mcloughlin is Associate Professor of Politics and Development University of Birmingham UK Sameen Ali is Assistant Professor of International Development University of Birmingham UK Kailing Xie is Assistant Professor of International Development University of Birmingham UK Nicholas Cheeseman is Professor of Democracy and International Development University of Birmingham UK David Hudson is Professor of Politics and Development University of Birmingham UK Development Centre Studies Financing Development 2008 Whose Ownership? McGuinn,2006 Education is intimately connected to many of the most important and contentious questions confronting American society from race to jobs to taxes and the competitive pressures of the global economy have only enhanced its significance Elementary and secondary schooling has long been the province of state and local governments but when George W Bush signed into law the No Child Left Behind Act in 2002 it signaled an unprecedented expansion of the federal role in public education This book provides the first balanced in depth analysis of how No Child Left Behind NCLB became law Patrick McGuinn a political scientist with hands on experience in secondary education explains how this happened despite the country s long history of decentralized school governance and the longstanding opposition of both liberals and conservatives to an active reform oriented federal role in schools His book provides the essential political context for understanding NCLB the controversies surrounding its implementation and forthcoming debates over its reauthorization how the struggle to define the federal role in school reform took center stage in debates over the appropriate role of the government in promoting opportunity and social welfare He places the evolution of the federal role in schools within the context of broader institutional ideological and political changes that have swept the nation since the 1965 Elementary and

Secondary Education Act chronicles the concerns raised by the 1983 report A Nation at Risk and shows how education became a major campaign issue for both parties in the 1990s McGuinn argues that the emergence of swing issues such as education can facilitate major policy change even as they influence the direction of wider political debates and partisan conflict McGuinn traces the Republican shift from seeking to eliminate the U S Department of Education to embracing federal leadership in school reform then details the negotiations over NCLB the forces that shaped its final provisions and the ways in which the law constitutes a new federal education policy regime against which states have now begun to rebel and that only by understanding the unique dynamics of national education politics will reformers be able to craft a more effective national role in school reform
