The Nation-State in Transformation Michael Boss, 2010-07-16 The Nation State in Transformation discusses the significance of the state in a globalised economy Focusing on Denmark and Ireland the book analyses how small states adapt to the international market and argues that the institutional mediation of globalisation helps us explain why some states seem to possess more capacity to adjust than others Not only must we bring the state back in we must also consider how history culture and collective identities influence the performance of the nation state in the new globalised world order With contributions by Francis Fukuyama Bob Jessop David

**Government-Linked Companies and Sustainable, Equitable Development** Terence Gomez, François Bafoil, Kee-Cheok Cheong, 2014-11-27 The debate over how far governments should intervene in economies in order to promote economic growth a debate which from the 1980s seemed settled in favour of the neo liberal non interventionist consensus has taken on new vigour since the financial crisis of 2008 and after Some countries most of them in industrialised Asia have survived the crisis and secured equitable economic growth by adopting a developmental state model whereby governments have intervened in their economies often through explicit support for individual companies This book explores debates about government intervention assesses interventionist policies including industrial and innovation policies and examines in particular the key institutions which play a crucial role in implementing government policies and in building the bridge between the state and the private sector The countries covered include China India South Korea Malaysia and Taiwan together with representative countries from Europe and Latin America

*Local and Regional Development* Andy Pike, Andrés Rodríguez-Pose, John Tomaney, Andres Rodríguez-Pose, 2006-11-22 Local and regional development is an increasingly global issue For localities and regions the challenge of enhancing prosperity improving wellbeing and increasing living standards has become acute for localities and regions formerly considered discrete parts of the developed and developing worlds Amid concern over the definitions and sustainability of development a spectre has emerged of deepened unevenness and sharpened inequalities in the development prospects for particular social groups and territories Local and Regional Development engages and addresses the key questions what are the principles and values that shape definitions and strategies of local and regional development What are the conceptual and theoretical frameworks capable of understanding and interpreting local and regional development What are the main policy interventions and instruments How do localities and regions attempt to effect development in practice What kinds of local and regional development should we be pursuing This book addresses the fundamental issues of what kind of local and regional development and for whom frameworks of understanding and instruments and policies It outlines what a holistic progressive and sustainable local and regional development might constitute before reflecting on its limits and political renewal With the growing international importance of local and regional development this book is an essential student purchase illustrated throughout with maps figures and case studies from Asia Europe and Central and North America

*Investment Incentives and the Global Competition for Capital* Kenneth P Thomas, 2010-11-24 The battle of national state and local governments to attract investment has been a high priority for decades For example US state and local governments give almost 50 billion in location incentives and over 70 billion in total subsidies annually Developing countries often pay even more for investments despite the fact they are less able to afford to do so Using case studies from around the world and at all levels of government

Thomas shows that investment incentives are rarely a good policy especially for countries lacking education and an infrastructure Finally he analyzes the myriad methods of controlling incentives with an emphasis on the EU s comprehensive and largely successful state aid rules illustrated by an extended case study of Ireland *Academy of Management Annual Meeting* Academy of Management,2005 **Creative Corporatism** Darius Parke Ornston,2009 *Entrepreneurship in Emerging Regions Around the World* Phillip Hin Choi Phan,Sankaran Venkataraman,S. Politics in Ireland Maura Adshead,Jonathon Tonge,2009-04 Politics in Ireland is the first major text to provide an accessible and systematic analysis of the politics of Ireland North as well as South With the development of a new Northern Irish political system and increasing links across the island the authors argue that the time is ripe to study together the two polities which share so much of a common history but which have had very different evolutions through the 20th century Drawing upon an exceptionally wide range of sources and their own original research the authors deploy a thematic approach to the study of political institutions political behaviour and public policy in both the Republic and Northern Ireland in order to produce a detailed but highly readable assessment of governance and politics in both political systems This approach enables them both to outline the differences and similarities between the polities and to explain how they relate to the wider world in particular to the UK and to Europe *Transforming Ireland* Debbie Ging,Michael Cronin,Peadar Kirby,2009 As Ireland s economic boom grounds to a sudden halt Transforming Ireland offers a diverse range of critical analyses of its legacies across different areas of Irish life the media racism consumerism sports education state surveillance and the pharmaceutical industry The book also maps out a politics of change for Irish society **Technology, Economic Security, State, and the Political Economy of Economic Networks** Huei-Huang Wang,1998 Technology Economic Security State and the Political Economy of Economic Networks unveils the motivation behind many of the economic actions of Asian countries at a time when the struggling Asian economies draw interest from around the world Using the very different economic systems of Taiwan and Japan it traces the influence of strategic decisions to the economic insecurity in these countries Here for the first time is not only a description of the economic structure of Asian countries but also the cultural and political influences that force the types of decisions that are made in those countries and create the economic structure **Contesting the State** Maura Adshead,Peadar Kirby,Michelle Millar,2008-10-15 This is the first comprehensive survey of the Irish state This book draws on different theoretical approaches to analyze the Irish state s origins evolution nature and role in Ireland s recent economic success The book begins by outlining the fragmentary way in which the Irish state has been treated to date in the social sciences Contributors from a range of disciplines then explore the history of the

Irish state from 1922 to 1973 the developmental nature of the Irish state since the 1980s the Irish state as a partnership state the gendered nature of the state the changing nature of the state s autonomy and capacity since independence and the activities and policies of the Irish state as a welfare state The editors draw out the lessons learned from this analysis before positing a challenging agenda for further research The book will be of major interest to students of Irish politics economics and social development It will also appeal to scholars of globalization and comparative politics and makes a significant contribution to analysis of the role of the state in this context      **The Shadow Economy, Corruption and Governance**
