Politics Of Reproduction:

The Politics of Reproduction Mary O'Brien, 2025-04-01 First published in 1981 *The Politics of Reproduction* is a critique of traditional political thought. It focuses centrally upon the nature and difference of male and female experience of biological reproduction and upon the impact of male reproductive experience on the theory and practice of politics. Mary O'Brien presents a controversial revision of dialectical materialism, arguing that Marx as a charter member of an exclusively masculine tradition of political thought could not provide the theoretical grounds for true social reformation. Only feminism, she argues, is currently a major progressive force in western history. The impact of reproductive technology on female consciousness is a world historical event which must be given theoretical and political expression. The new model of historical process offered here in preliminary form gives due weight to the struggle of the sexes, which has its historical reality in the separation of public and private life. The model is founded on an analysis of male stream thought from the Athenian polis to our own day, and it makes possible a radical interpretation of contemporary women's experience that never lapses into either a historicism or simple rage.

Conceiving the New World Order Faye D. Ginsburg, Rayna Rapp, 1995-07-31 This volume provides an investigation of the dynamics of reproduction. Using reproduction as an entry point, the authors examine how cultures are produced, contested, and transformed as people imagine their collective future in the creation of the next generation.

Beyond Conception Patricia Spallone, 1989 *Beyond Conception* is a feminist critique of the new reproductive and genetic technologies whose impact has been most apparent since the birth of the first test tube baby. The author finds that these technologies are not created in women's interest. Instead, they require the subordination of women to science.

How All Politics Became Reproductive Politics Laura Briggs, 2017-09-12 Today all politics are reproductive politics, argues esteemed feminist critic Laura Briggs. From longer work hours to the election of Donald Trump, our current political crisis is above all about reproduction. Households are where we face our economic realities as social safety nets get cut and wages decline. Briggs brilliantly outlines how politicians' racist accounts of reproduction—stories of Black welfare queens and Latina breeding machines—were the leading wedge in the government and business disinvestment in families. With decreasing wages, rising McJobs, and no resources for family care, our households have grown ever more precarious over the past forty years in sharply race and class stratified ways. This crisis, argues Briggs, fuels all others: from immigration to gay marriage, anti-feminism to the rise of the Tea Party.

The Politics of Reproduction Modhumita Roy, Mary Thompson, 2019 Original essays bring together the entangled reproductive politics of abortion, adoption, and commercial surrogacy in a global context and neoliberal age.

Births And Power W. Penn Handwerker, 2019-04-11 This book challenges orthodox public perspectives on reproduction. It relies on participant observation, field censuses, interviews, and use of official demographic, epidemiological, and health statistics.

the cost of life in a transnational context Beginning in the late nineteenth century India played a pivotal role in global conversations about population and reproduction In *Reproductive Politics and the Making of Modern India* Mytheli Sreenivas demonstrates how colonial administrators postcolonial development experts nationalists eugenicists feminists and family planners all aimed to reform reproduction to transform both individual bodies and the body politic Across the political spectrum people insisted that regulating reproduction was necessary and that limiting the population was essential to economic development This book investigates the often devastating implications of this logic which demonized some women s reproduction as the cause of national and planetary catastrophe To tell this story Sreenivas explores debates about marriage family and contraception She also demonstrates how concerns about reproduction surfaced within a range of political questions about poverty and crises of subsistence migration and claims of national sovereignty normative heterosexuality and drives for economic development Locating India at the center of transnational historical change this book suggests that Indian developments produced the very grounds over which reproduction was called into question in the modern world The open access edition of *Reproductive Politics and the Making of Modern India* is freely available thanks to the TOME initiative and the generous support of The Ohio State University Libraries DOI 10 6069 9780295748856 [Seizing the Means of Reproduction](#) Claudette Michelle Murphy, 2012-11-26 In *Seizing the Means of Reproduction* M Murphy s initial focus on the alternative health practices developed by radical feminists in the United States during the 1970s and 1980s opens into a sophisticated analysis of the transnational entanglements of American empire population control neoliberalism and late twentieth century feminisms Murphy concentrates on the technoscientific means the technologies practices protocols and processes developed by feminist health activists They argue that by politicizing the technical details of reproductive health alternative feminist practices aimed at empowering women were also integral to late twentieth century biopolitics Murphy traces the transnational circulation of cheap do it yourself health interventions highlighting the uneasy links between economic logics new forms of racialized governance U S imperialism family planning and the rise of NGOs In the twenty first century feminist health projects have followed complex and discomfiting itineraries The practices and ideologies of alternative health projects have found their way into World Bank guidelines state policies and commodified research While the particular moment of U S feminism in the shadow of Cold War and postcolonialism has passed its dynamics continue to inform the ways that health is governed and politicized today [The Political Economy of Reproduction in Japan](#) Takeda Hiroko, 2004-09-23 This book analyzes the political economy of reproduction and its role in the process of Japanese modernization Hiroko analyzes state attempts and policies to intervene into women s bodies and everyday lives to integrate them into the Japanese political economy Based on Foucault s concept of governmentality the author develops a model to assess reproduction in three forms economic biological and socio political from 1868 until the present day **Governed Through Choice** Jennifer M. Denbow, 2015-08-07 At the center of the war on women lies the fact that women in the

contemporary United States are facing increased surveillance of their reproductive health In recent years states have passed a record number of laws restricting abortion and reproductive rights Physicians continue to sterilize some women against their will especially those in prison in other cases women seeking medical interventions to prevent pregnancies encounter resistance from the medical community While these trends seem to undermine women s decision making authority experts and state actors often defend such policies and actions as actually promoting women s autonomy In *Governed through Choice* Jennifer M Denbow analyzes recent reproductive measures such as informed consent to abortion laws and the regulation of sterilization in order to expose how the notion of autonomy allows for such a striking contradiction in how reproductive policies affect women Yet Denbow also offers an understanding of autonomy as critique and transformation of oppressive norms Denbow shows how developments in reproductive technology which would seem to increase women s options and autonomy provide increased opportunities for state management of women s bodies However she also argues that reproductive technologies can disrupt oppressive norms about reproduction and gender and ultimately enable social transformation A critically important analysis *Governed through Choice* is a trailblazing look at how the law regulates women s bodies as reproductive sites and what can be done about it Unedited summary from paperback book cover

The Micro-Politics of Capital Jason Read,2012-02-01 What is the relation between the economy or the mode of production and culture beliefs and desires How is it possible to think of these relations without reducing one to the other or effacing one for the sake of the other To answer these questions *The Micro Politics of Capital* re reads Marx in light of the contemporary critical interrogations of subjectivity in the works of Althusser Deleuze Guattari Foucault and Negri Jason Read suggests that what characterizes contemporary capitalism is the intimate intersection of the production of commodities with the production of desire beliefs and knowledge

Replacing the Dead Mie Nakachi,2021 In 1955 the Soviet Union became the first country in the world to re legalize abortion on the principle of women s rights to abortion How could this happen in Stalinist society which prohibited feminist movements *Replacing the Dead* finds an answer in previously secret archives that document the difficult decade after World War II which killed 27 million Soviet citizens and the government s policy to increase fertility by promoting out of wedlock births The result was an abortion battle between women government and Soviet legal and medical professionals that has continued for decades
