

Palm Leaf Fish

1. peel the leaf sides off of the frond vein (don't throw anything away!)

It is easier to peel if you start from the bottom of the leaf

← Leaf side

← Vein

(Leaf A)

(Leaf B)

2. fold each leaf side in half (place the leaf vein on the side)

3. weave leaf B into leaf A as shown. (make sure leaf B is the layer at the top, and that it's pointing to the right)

If you wish to put in a knotted vein (for instructions, see below) place the knot in the space indicated by the arrow above before tightening the weave

4. While holding the base of the fish with your left hand, grab the back of leaf B with your right hand and gently slide it to the left without moving the other leaves

Notice that the two sides lie parallel

5. Fold leaf B over so that its edge lies parallel to the top of leaf A. The leaf should also go between the two layers of leaf A.

6. Flip the model to the back side. It should look like this:

Grabbing the same leaf we wrapped before, fold over the top leaf so that it lies parallel to its backside (see next picture for detail)

7. Now, while holding the other leaves in place, gently slide the back layer of leaf A to the left. (This is similar to step 4)

8. With the leaf you just grabbed, weave it down through the layers as shown. When finished, flip the model back over

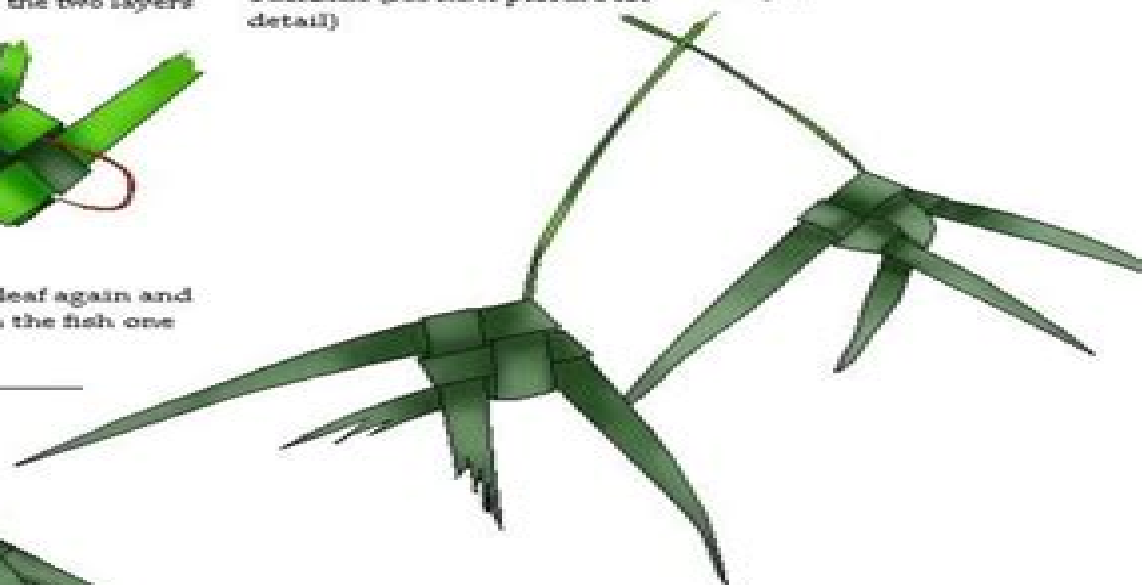

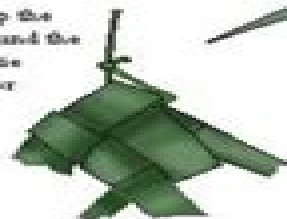

9. grab the same leaf again and weave it through the fish one more time.

To Make The Pole to Hang The Fish

Make ———→ knot up here

Tie a knot at the tip of the vein and insert into model as shown after step 3

...or wrap the vein around the fish and tie (better for loosely woven fish)
