Rangelands A Resource Under Siege Proceedings Of The Second Inter Rangeland Congress:

Rangelands: A Resource Under Siege P. J. Joss, P. W. Lynch, O. B. Williams, 1986 This volume comprises the proceedings of the Second International Rangelands Congress held in Adelaide Australia in May 1984 and includes some 350 contributions drawn from 43 different countries The Congress addressed the problem of the conflict between land users and the degradation of this valuable resource Some 40% of the Earth's land surface is arid or semi-arid and therefore unsuitable for agricultural cultivation Collectively these lands are known as rangelands and in their natural state they constitute a habitat for grazing animals both domestic and wild Despite their low productivity rangelands have been used for thousands of years as a source of food and fibre but other uses such as mining tourism recreation and conservation are exerting increasing demands The result is often conflict between land users and degradation of the resource General Technical Report RM.
