Lahue,1981-08-31 Rapid advances in knowledge have led to an increasing interest in neuro biology over the last several

years These advances have been made possible at least in part by the use of increasingly sophisticated methodology Furthermore research in the most rapidly advancing areas is essentially multidisciplinary and is characterized by contributions from many investigators employing a variety of techniques While a grasp of fundamental neurobiological concepts is an obvious prerequisite for those who wish to follow or participate in this field critical awareness and evaluation of neurobiological research also requires an understanding of sophisticated methodologies The objective of *Methods in Neurobiology* is the development of such critical abilities The reader is exposed to the basic concepts principles and instrumentation of key methodologies and the application of each methodology is placed in the special context of neurobiological research The reader will gain familiarity with the terminology and procedures of each method and the ability to evaluate results in light of the particular features of neurobiological preparations and applications
