Polymer Characterization Symposium on Interdisciplinary Approaches to the Characterization of Polymers\$ (1970 : Chicago),1970 Polymer Characterization Interdisciplinary Approaches Clara D Craver,1995-12-31 **Polymer Characterization Interdisciplinary Approaches** Clara D. Craver,2012-12-06 Physical and spectroscopic methods have been used jointly for characterization of polymers for at least four decades Yet new techniques permit increasingly refined determination of polymer chemistry and morphology_ The correlation of this knowledge with physical properties of polymers is helpful to planned synthesis of new products The most prominent spectroscopic techniques through the forties and fifties were infrared and ultraviolet spectroscopy Nuclear magnetic resonance electron spin resonance and Mossbauer spectroscopy started making significant contributions to polymer chemistry in the early sixties Still more recently fluorescence spectroscopy and laser Raman spectroscopy have become readily applicable to polymers and are contributing significantly to the understanding of the relationship between polymer structure and properties Determination of the distribution of monomer sequences by molecular size has become possible through combined gel permeation chromatography and spectroscopic analysis Fragments of polymers from chemical breakdown or from pyrolysis are further fractionated and structurally analyzed The relationship between the chemistry of polymers and performance can be determined from changes in chemical structure and orientation after curing degradation or physical or thermal manipulation of the polymers *Polymer Characterization: Interdisciplinary Approaches: Proceedings of the Symposium on Interdisciplinary Approaches to the Characterization of Polymers at the Meeting of the American Chemical Society, Chicago, 1970* American Chemical Society Meeting,Symposium on Interdisciplinary Approaches to the Characterization of Polymers,1971 **POLYMER CHARACTERIZATION INTERDISCIPLINARY APPROACHES.** CD CRAVER (ED.),1971
