Ramseys Ontology:

The Four-Category Ontology E. J. Lowe,2005-12-01 E J Lowe sets out and defends his theory of what there is His four category ontology is a metaphysical system that recognizes two fundamental categorial distinctions which cut across each other to generate four fundamental ontological categories The distinctions are between the particular and the universal and between the substantial and the non substantial The four categories thus generated are substantial particulars non substantial particulars substantial universals and non substantial universals Non substantial universals include properties and relations conceived as universals Non substantial particulars include property instances and relation instances otherwise known as non relational and relational tropes or modes Substantial particulars include propertied individuals the paradigm examples of which are persisting concrete objects Substantial universals are otherwise known as substantial kinds and include as paradigm examples natural kinds of persisting objects This ontology has a lengthy pedigree many commentators attributing it to Aristotle on the basis of certain passages in his apparently early work the Categories At various times during the history of Western philosophy it has been revived or rediscovered but it has never found universal favour perhaps on account of its apparent lack of parsimony as well as its commitment to universals In pursuit of ontological economy metaphysicians have generally preferred to recognize fewer than four fundamental ontological categories However Occam s razor stipulates only that we should not multiply entities beyond necessity Lowe argues that the four category ontology has an explanatory power unrivalled by more parsimonious systems and that this counts decisively in its favour He shows that it provides a powerful explanatory framework for a unified account of causation dispositions natural laws natural necessity and many other related matters such as the semantics of counterfactual conditionals and the character of the truthmaking relation As such it constitutes a thoroughgoing metaphysical foundation for natural science Contents List *The Philosophy of F. P. Ramsey* Nils-Eric Sahlin,1990-08-31 F P Ramsey was a remarkably creative and subtle philosopher who made significant contributions to logic philosophy of mathematics philosophy of language and decision theory **Ramsey's Legacy** Hallvard Lillehammer,D. H. Mellor,2005-07-28 The Cambridge philosopher Frank Ramsey died tragically in 1930 at the age of 26 but had already established himself as one of the most brilliant minds of the 20th century These original essays written to commemorate the centenary of Ramsey s birth offer fresh perspectives on his work and show its ongoing relevance

Frank Ramsey Jérôme Dokic,Pascal Engel,2003-08-29 Despite his tragic death at the age of 26 Frank Ramsey 1903 1930 remains one of the most intriguing minds of the twentieth century His thought had a profound influence on both Ludwig Wittgenstein and Bertrand Russell and many strands of contemporary analytic philosophy find their origin in Ramsey s ideas Frank Ramsey Truth and Success provides a much needed introduction to the work of this undervalued thinker and makes an important and profound contribution to our understanding of Ramsey s work and his place in twentieth century philosophy It will be of interest to all students of logic metaphysics and the history of philosophy **F. Frapolli,2004-12-15 Frank Plumpton Ramsey 1903 1930 Cambridge mathematician and philosopher was one of the most brilliant people of his generation He lived in an extraordinarily stimulating milieu surrounded by figures such as Russell Whitehead Keynes Moore and Wittgenstein Ramsey s highly original papers on the foundations of mathematics probability economics philosophy of science and the theory of knowledge were very influential in the 20th century and are still widely discussed in the 21st Perhaps two of Ramsey s achievements outshine all the rest One is his treatment of the theoretical terms of scientific theories and the other is his deflationary account of truth In Theories 1929 he showed that for any theory it is always possible to offer an empirically equivalent one that does not contain theoretical terms by re expressing it in what later became known as Ramsey sentences His account of truth was rediscovered in the 1960s and is now known as the prosentential theory of truth according to which to say that a sentence is true is simply to assert or reassert that sentence not to ascribe the property of truth to it This collection of eleven new papers specially written to commemorate his centenary answers a crying need for more secondary literature on Frank Ramsey Nearly all the aspects of Ramsey s work are examined his logic philosophy of mind philosophy of science metaphysics epistemology pragmatism economics and the mutual influences between Ramsey and Wittgenstein The book will be eagerly welcomed by those working in many branches of analytic philosophy and beyond   **Linguistic and Philosophical Perspectives about Reference** Ana Clara Polakof,2025-11-13 Bringing varied perspectives on problems related to reference from philosophers of language and linguists this edited collection initiates a dialogue between the two fields The contributors to this volume both philosophers and linguists answer four questions What is reference Is there reference to the abstract Is there sentential reference Is there reference to time Each chapter is followed by two responses A linguist will comment on what the philosopher said and how it can impact the research made in the related linguistic field while a philosopher will comment on what the linguist said in a similar sort of fashion Edited by Ana Clara Polakof Linguistic and Philosophical Perspectives about Reference highlights ways that linguistics and philosophy of language are currently closely connected and can mutually benefit from sustained interaction   Zeitschrift für Philosophie und philosophische Kritik ,1870   Zeitschrift für Philosophie und philosophische Kritik ,1870   Zeitschrift für Philosophie und spekulative Theologie [afterw.] und philosophische Kritik, herausg. von J.H.
