Rationale For Nonviolence:

Conflict: Violence and Nonviolence Joan Valerie Bondurant, **Promoting Nonviolence in Early Adolescence** Aleta L. Meyer, Albert Farrell, Wendy Northup, Eva Kung, Laura Plybon, 2012-12-06 In preparation for role play during a RIPP class 6th grade students consider the following conflict situation Sharon and Josie who are good friends tryout for the basketball team Josie makes the team but Sharon does not The week after tryouts Sharon tries to pick a fight with Josie calling her a cheater and some one the coach felt sorry for Josie is in a bind she wants to remain friends with Sharon but she is really angry with Sharon for treating her so badly What can Josie do in this situation What type of self talk will help her work out this problem with Sharon and keep the friendship During the role play Sharon calls Josie a cheater Then before Josie responds two students representing her positive and negative sides take turns whispering into her ear Negative self talk Boy is she a loser What if everyone believes her and thinks that I cheated to get on the team Positive self talk I know I worked hard to get on the team Sharon must really be hurt that she didn't make it I can talk to her later when she's cooled down and maybe we can do something together after practice Josie listens to the two voices and decides that the best approach is to ignore Sharon's comments for now and to call her later that day to see if they can do something together This description of students dealing with everyday conflicts is quite real

Functions in Autoregulative Weapons Systems Nicole Kunkel, 2024-12-30 This book connects two of the most pressing ethical topics of our time questions of peace and technology materialized in so called autonomous weapons systems which can operate without human control and intervention in real time The author however criticizes the term autonomy as too anthropomorphic and therefore misleading She consequently proposes using the term autoregulation in its place Taking a contingent pacifist stance this book addresses the question of whether such technological means help or hinder peace processes The argument is tripartite First it is demonstrated that the risk of harm to nonparticipants is very likely to increase Second and with respect to responsibility it is indicated that a human machine system can only be operated responsibly if a human is in control Finally this idea is transferred into theological thought through reference to Bonhoeffer's idea of incurring guilt in acting responsibly In that context autoregulative technology might pose the possibility of shying away from responsibility and therefore becoming guilty This book is among the first ethical considerations of lethal autoregulative weaponry from a contingent pacifist stance and brings together peace ethical thinking and theories from various backgrounds
