Erosion des Wachstumsparadigmas: Neue Konfliktstrukturen im politischen System der Bundesrepublik? Bernhard Weßels, 1991 Geht mit dem kologischen Protest der Basis und Verfassungskonsens die Verst ndigung ber Grundfragen der Gesellschaft verloren und entsteht dadurch eine neue Konfliktlinie im politischen System der Bundesrepublik Unter dieser Fragestellung untersucht der Autor die wertbezogenen sozialstrukturellen und organisatorischen Bedingungen kologischen Protests in den achtziger Jahren Im Mittelpunkt der Arbeit steht die Frage wer die Tr ger des kologischen Konflikts sind ob sich hinter den Konfliktpotentialen eine neue Verteilungsfrage verbirgt und welche Rolle Bewegungsorganisationen und ffentliche Kritik im Umweltschutz spielen

Theoretical Issues in Policy Analysis M. E. Hawkesworth, 1988-08-09 What is the relation between policy analysis and political decision making Is the policy analyst a handmaiden of democracy or an agent of technocracy Do recent debates in the policy literature illuminate or obfuscate these issues What analytic techniques are available to resolve such questions This study considers the nature of policy inquiry in detail and explores norms and theoretical assumptions seldom subjected to scrutiny The author demonstrates how conceptual presuppositions and methodological commitments have constricted our understanding of political problems and so hindered prescriptions for viable policy options Proposed here is an alternative framework for policy inquiry that is both pragmatic and sophisticated Hawkesworth considers the implications of this alternative model in a series of case studies that addresses important foreign and domestic policy issues

The epistemic and practical criticisms presented in this study provide new direction for the field of policy studies

Evaluating Public Policy Frank Fischer, 1995
Millions of dollars are spent each year on the evaluation of domestic and foreign policies. Policy analysis has emerged as an important component of the policy-making process in American government. This text differs from others not only does it teach students how to evaluate the empirical aspects of a public policy but also provides an analytical framework for assessing the value judgements that infuse policy decisions. Students learn to assess whether a program reflects the kinds of things that society ought to be doing.

From Planning to Action International Institute for Educational Planning, 1997
This book results from a project jointly conducted by the International Institute for Educational Planning (IIEP) France and the Advancing Basic Education and Literacy (ABEL) Project USA. It examines strategies that have been widely advocated to enable central and regional education ministries to influence education practice at the school level, particularly in ways that result in improved educational quality and efficiency. This is accomplished through a series of case studies of national efforts to implement those strategies. These case studies identify the types of cross impacts, unintended consequences, both positive and negative, and practical problems of implementation that provide the basis for assessing the potential of these strategies to actually influence classroom practice. The book further examines what kinds of information planners, administrators, and teachers need and how the communication of information should be organized to successfully undertake these actions. Information and communication have emerged as the new currency of development. The conclusions to the book propose training aimed at education leaders, planners, and administrators, particularly in developing country settings who are searching for ways of ensuring that government initiatives can make a meaningful difference at the school and classroom
