Reaching Beyond Your Grasp:

Idealist Alternatives to Materialist Philosophies of Science, 2019-12-09 Idealist Alternatives to Materialist Philosophies of Science ed Philip MacEwen makes the case that there are other and arguably better ways of understanding science than materialism Philosophical idealism leads the list of challengers but critical realism and various forms of pluralism are fully articulated as well To ensure that the incumbent is adequately represented the volume includes a major defence of materialism naturalism from Anaxagoras to the present Contributors include Leslie Armour John D Norton and Fred Wilson with a Foreword by Nicholas Rescher For anyone interested in whether materialism has a monopoly on science this volume presents a good case for materialism but a better one for its alternatives *The Weaponization of Weather in the Phony Climate War* Joe Bastardi, 2020-09-08 What if climate change is naturally occurring and cyclical What if trillions of dollars will be spent to accomplish nothing What if the real agenda is not about science climate and weather but simply uses this as a tool to disrupt and destroy the foundational concepts of one nation under God that have led to the greatest quality of life and liberty the world has ever known At 65 Joe Bastardi is one of the most experienced meteorologists in the world today His knowledge of past major events puts into perspective the extreme weather events seen today that are nothing new and in fact not as severe as before In this book Bastardi goes in depth to document naturally occurring climate and weather events to question those whose agenda it is to weaponize each weather event for the pursuit of a political and social aim Of course the climate is changing and with the many natural influencers constantly in play it always will Thanks to an ever fluctuating level of activity in the large natural drivers that have always controlled it such as our Sun the oceans stochastic events and the very design of the system itself climate change is natural A single attribution to man as the climate control knob in the face of this is questionable if not a stretch The reader should at least look at the ideas presented here said Bastardi Joe understands the fear today given what has been nothing short of public indoctrination His new book offers an environmentally friendly and inexpensive solution to alleviate those fears that will not destroy the economic lifeline of this nation as the Green New Deal surely will It begins with removing the fear that has been pushed to create what is becoming irrational panic especially with our young So is this book important on multiple levels You decide **In the Footsteps of Dante** Teresa Bartolomei, Joao R. Figueiredo, 2023-01-30 Dante the pilgrim is the image of an author who stubbornly looks ahead seeking and building the Great Beyond Manguel Following in his footsteps is therefore not a return to the past going rebours but a commitment to the future to exploring the potential of humanity to transhumanise This dynamic of self transcendence in Dante s humanism Ossola which claims for European civilisation a vocation for universalism Ferroni is analysed in the volume at three crucial moments Firstly the establishment of an emancipatory relationship between author and reader Ascoli in which authorship is authority and not power secondly the conception of vision as a learning process and horizon of eschatological overcoming Mendon a finally the relationship with the past which is never purely monumental but

ethically and intertextually dynamic in an original rewriting of the original scriptural medieval and classical culture Nasti Bolzoni Bartolomei A second group of contributions is dedicated to the reconstruction of Dante's presence in Portuguese literature Almeida Espirito Santo Figueiredo Marnoto Vaz de Carvalho they attest to the innovative impact of Dante's work even in literary traditions more distant from it The Life, Letters and Writings of Charles Lamb Charles Lamb, 1875
