Set Up Sold Out Find Out What Green Really Means:

Set Up & Sold Out Holly Swanson, 1995 It's The Sun, Not Us L.D. den Boer, 2019-08-27 Earth's climate is changing it always has and always will. The cause may be debated but man-made global warming has become the accepted narrative and Big Oil the popular villain. Anyone daring to challenge this consensus is attacked, smeared, demonized as a denier even threatened. Researchers who refuse to toe the line are discredited, dismissed as incompetent and blacklisted regardless of their expertise, experience or credentials. This is not how science is conducted. But not everyone can be silenced. The author of this book is not incompetent. Nor was he paid to write it. He's just someone who cares about the truth, a scientist with a broad understanding of how Earth's climate works and how it has changed over time. His book is divided into two parts: science and ideology. The first part explains in language laypersons can understand how the Sun, cosmic rays and other natural factors control Earth's climate and why carbon dioxide is virtually irrelevant. The second part exposes and refutes the green ideology of man-made global warming, revealing the economic damage it causes. It may be short but it's well researched, packed with information and an enjoyable, rewarding read. Green Valley #3 (Of 9) Max Landis, 2016-12-14 THE WIZARD REVEALED
