Das,1993 Traditional aggregate theories of the business cycle Keynesian or the neoclassical have not succeeded in explaining the severe down turns in the United States and other advanced economies New Perspectives on Business Cyclesproposes a theory that economic inequality and heterogeneity in a market economy may be an important influence on business cycles The author Satya Das provides for the first time a systematic assessment of possible links between business cycles and changes in the distribution of income and

wealth Arguing that changes in the distribution of wealth and income in a private market economy can generate variations in the aggregate output Professor Das uses a series of models to relate economic inequalities across households to fluctuations in the economy In particular he argues that severe inequities in wealth and income distribution can lead to fluctuations in a macroeconomy with important implications for the financial markets Empirical evidence from the post war US economy is presented in support of this theory **Evolutionary Macroeconomics** John Foster,1987 **Economic Strategies** Alan Charles Lynn Day,1986 **Large-scale Macro-econometric Models** Jan Kmenta,James Bernard Ramsey,1981 Forecasting economic variables Advancement of economic knowledge and the size of macro econometric models Construction of macro econometric models Evaluation of macro econometric models *Macro, Monetary & Financial Economics Reading Lists* Edward Tower,1990 *Papers and Proceedings of the Annual Meeting* American Economic Association,2008
