Rational Readings On Environment Concerns:

Green Backlash Andrew Rowell, 1996 Green Backlash blows the lid off the political Right and industry as they fight back examining the threats and challenges and concludes how the environmental movement can re evaluate and change for the better to overcome this

Global Warming in a Politically Correct Climate M. Mihkel Mathiesen, 2004-01-04 Societies unravel when they lose the glue that holds them together The opening words of *Global Warming in a Politically Correct Climate* reveal author M Mihkel Mathiesen s passionate struggle to reveal how the truth has become controversial in the modern community Mathiesen explores the paralyzing effect political correctness has on society and the associated environmental scares the public has accepted as fact for 30 years Contrasting the exaggerations and glib explanations of politicians advocacy groups and bureaucracies Mathiesen provides a clear and revolutionary account of the actual science behind five major environmental campaigns As the title indicates Mathiesen s work culminates in a relentlessly objective analysis of the real causes of the present global warming Based on the latest scientific findings *Global Warming in a Politically Correct Climate* contains densely packed information never before published in a format accessible to the non scientist With the forgiving veil of political correctness lifted the roles of advocacy groups bureaucracies politicians industry the legal profession and career conscious scientists are examined Mathiesen particularly scrutinizes the media *Global Warming in a Politically Correct Climate* is an enlightening look at how the transfer of wealth from an unwitting public is justified by averting non existent threats and how greed rather than pure idealism is at work in environmental politics

Rational Readings on Environmental Concerns Jay H. Lehr, 1992-08-04 the proof of man s destruction of the environment is consistently flawed the scientific method is being abused and ignored The errors are not random however but are systematically biased toward attempting to prove the guilt of man in the alleged destruction of the planet Objective science is disappearing and is being replaced by the pursuit of a philosophical agenda Richard F Sanford in *Environmentalism and the Assault on Reason* Chapter 1 The public has numerous misconceptions about the relationship between environmental pollution and human cancer Underlying these misconceptions is an erroneous belief that nature is benign Bruce N Ames Ph D and Lois Swirsky Gold Ph D in *Environmental Pollution and Cancer Some Misconceptions* Chapter 7 Greenhouse gases have been increasing in the atmosphere largely as a result of human activities However the climate record does not show the temperature increase and other telltale signs of the expected greenhouse effect The mathematical models used for predicting such effects are evidently not complete enough to encompass all of the relevant physical processes in the atmosphere thus throwing grave doubt on the drastic warming hypothesized for the next century S Fred Singer in *Global Climate Change Facts and Fiction* Chapter 13 There is now no prima facie case for any expensive policy of safeguarding species without more extensive analysis than has so far been done Julian L Simon in *Disappearing Species Deforestation and Data* Chapter 26
