Rationality And Science Can Science Explain Everything:

Rationality and Science Roger Trigg, 1993 Can science hope to provide a Theory of Everything a final explanation of the nature of the Universe Is science our sole source of knowledge These questions are being increasingly asked and yet at the same time many distrust science and have become disillusioned with its effects on our world Can science and scientific practice be justified What are the rational foundations of science Many contemporary philosophers are bewitched by the idea that there must be some neutral ground or a God's eye view to which we can appeal when we wish to justify a whole conceptual scheme The impossibility of finding one drives many to relativism How far can reason and the idea of reality be upheld in the face of this criticism In this important new book Professor Trigg faces these issues squarely and examines how far it is possible to give reasons for trusting science In defending a realist outlook Trigg aims to show that even physical science must be given metaphysical foundations In so doing he explains and evaluates the views of Rorty Wittgenstein Quine Putnam and Hawking amongst others The limits of science and rationality are explored and the power of human reason is in the end upheld

Can Science Explain Everything? John Lennox, 2019-01-01 An inspiring new perspective on the science versus religion debate An inspiring new perspective on the science versus religion debate Can science explain everything Many people think so Science and the technologies it has spawned has delivered so much to the world clean water more food better healthcare longer life And we live in a time of rapid scientific progress that holds enormous promise for many of the problems we face as humankind So much so in fact that many see no need or use for religion and belief systems that offer us answers to the mysteries of our universe Science has explained it they assume Religion is redundant Oxford Maths Professor and Christian believer John Lennox offers a fresh way of thinking about science and Christianity that dispels the common misconceptions about both He reveals that not only are they not opposed but they can and must mix to give us a fuller understanding of the universe and the meaning of our existence

The Interplay Between Scientific and Theological Worldviews Niels Henrik Gregersen, Ulf Görman, Christoph Wassermann, 1999 *The Territories of Human Reason* Alister E. McGrath, 2019 The Territories of Human Reason is the first major study to explore the emergence of multiple situated rationalities It focuses on the relation of the natural sciences and Christian theology but its approach can easily be extended to other disciplines

Essays in Postfoundationalist Theology Jacobus Wentzel Van Huyssteen, Wentzel Van Huyssteen, 1997 This collection of essays boldly addresses many of the challenges faced by Christian theology in the context of contemporary postmodern thought Handling abstract topics in a remarkably clear and concise way J Wentzel van Huyssteen presses the case for a postfoundationalist theology as a viable third option beyond the extremes of foundationalism and nonfoundationalism Van Huyssteen discusses themes related to rationality epistemology and philosophy of science In the process he critically engages the work of such thinkers as Wolfhart Pannenberg Nancey Murphy Jerome Stone and Gerd Theissen The result is a convincing argument that only a truly accessible and philosophically credible notion

of interdisciplinarity will be able to pave the way for a plausible public theology that can play an important intellectual role in our fragmented culture today **Taking Rational Trouble Over the Mysteries** Nicola Hoggard Creegan, Andrew Shepherd, 2013-07-29 How can one believe in an age of doubt How can we name the mystery of God in human words Does nature speak of the glory of God Does science undermine faith Is the problem of evil unanswerable In this volume scientists theologians philosophers as well as a historian and social scientist take seriously the challenge of knowing and speaking about God in an age of doubt and challenge All New Zealand writers the authors reflect a variety of styles inputs and assumptions from down under Some look to answer new atheists directly others point out links between belief and unbelief in any age There are essays that show us new ways of reading old texts Scientists reflect on nature its signs and its obscurity We are confronted also with the mixed picture of belief and unbelief that the last few hundred years reveals to us Most of these essays have come out of seminars and conferences put on by TANSA Theology and the Natural Sciences in Aotearoa a forum for discussion and interpretation amongst scientists and theologians in New Zealand **Core Questions in**

Philosophy Elliott Sober, 2021-05-26 Written in an engaging lecture style format this 8th edition of Core Questions in Philosophy shows students how philosophy is best used to evaluate many different kinds of arguments and to construct sound theories Well known historical texts are discussed not as a means to honor the dead or merely to describe what various philosophers have thought but to engage with criticize and even improve ideas from the past In addition because philosophy cannot function apart from its engagement with the wider society traditional and contemporary philosophical problems are brought into dialogue with the physical biological and social sciences Text boxes highlight key concepts and review questions discussion questions and a glossary of terms are also included Core Questions in Philosophy has served as a premier introductory textbook for three decades with updates to each new edition Key updates to this 8th edition include A new chapter Probability and Bayes Theorem A new explanation of the concept of soundness as a useful tool in assessing arguments A clearer explanation in the chapter on evolution of the crucial biological idea that the similarities of different species provide evidence of their common ancestry A new discussion of evolutionary altruism in the chapter on psychological egoism A presentation of two interesting arguments from historically important Islamic and Confucian philosophers Improved clarity and updated material from philosophy and empirical research throughout Revisions to the online list of recommended resources include Additional recommendations of supplementary readings with the inclusion of more work from female philosophers New recommended videos and podcasts all organized by their relevance to each chapter in the book
