Reaching For The High Frontier:

The Politics of Space Eligar Sadeh, 2010-11 This title provides a concise guide to the way in which politics and space exploration interact

The Development of Outer Space Thomas Gangale, 2009-07-23 This account of the evolution of outer space law examines key issues that fuel the debates over sovereignty and property rights designed to govern the future colonization and use of heavenly bodies other than our own In the United States lobbies for the commercial development of space have become increasingly antagonistic toward the international legal regime of outer space condemning the 1967 Outer Space Treaty and the unratified 1979 Moon Agreement as anti business The Development of Outer Space Sovereignty and Property Rights in International Space Law argues that the *res communis* principle enshrined in the Outer Space Treaty was misrepresented here with essential help from corporate lobbyists whose real object was the defeat of the Law of the Sea Convention Thomas Gangale builds the legal case for reviving the moribund Moon Agreement as a prelude to negotiating a second Moon treaty to establish a regulatory regime for the exploitation of extraterrestrial resources The author's account of the inception and evolution of outer space law to date is deeply informed by his appreciation of such terrestrial considerations as the nation state system the contending economic theories of capitalism and communism and the post colonial struggle between the developed space faring nations and the developing earthbound nations

Scramble for the Skies Namrata Goswami, Peter A. Garretson, 2020-10-06 With a focus on China the United States and India this book examines the economic ambitions of the second space race The authors argue that space ambitions are informed by a combination of factors including available resources capability elite preferences and talent pool The authors demonstrate how these influences affect the development of national space programs as well as policy and law

SPACE & AMERICAN IMAGINATION Howard E. McCurdy, 1997-10-17 Examining popular images that have helped motivate the most ambitious civil space program in the world McCurdy argues that the spacefaring dream tapped into several of America's most deeply rooted cultural ideals He also explains how space advocates playing on the public's Cold War fears convinced politicians that control of space meant control of the earth He also contends that the gaps between expectations and reality led to public policy obligated to entertain as well as inform 43 photos

The Rise of the Commercial Space Industry Brian C. Odom, 2024-09-13 This collection explores the evolution of the commercial space industry from the beginning of the space age through the early twenty first century Today the space industry is taking on an increased leadership and innovation role in both space access and exploration The growth of commercial space over the past decades offers a potential new paradigm for space exploration one in which industry transitions from supplier to partner However many questions remain This book seeks to bring to light these questions which span from the most seemingly consequential how will humanity explore the Moon and Mars to the most basic what is commercial space To further develop the historical context of commercial space and thereby better inform decision making at NASA in the future this volume examines a broad range of questions related to

the history of commercial space operations including but not limited to how has the concept of commercial space evolved in different fields and disciplines What have been the major events and milestones in the emergence and evolution of commercial space activities in the USA and internationally How has the US Government assisted or impeded the emergence and evolution of commercial space activities Providing contributions from a range of different disciplines and backgrounds the authors of this volume offer valuable insights for scholars researching the history of space and space policy as well as decision makers working at NASA or within the wider space industry **Limiting Outer Space** Alexander C.T.

Geppert,2018-04-18 **Limiting Outer Space** propels the historicization of outer space by focusing on the Post Apollo period After the moon landings disillusionment set in Outer space no longer considered the inevitable destination of human expansion lost much of its popular appeal cultural significance and political urgency With the rapid waning of the worldwide Apollo frenzy the optimism of the Space Age gave way to an era of space fatigue and planetized limits Bringing together the history of European astroculture and American Soviet spaceflight with scholarship on the 1970s this cutting edge volume examines the reconfiguration of space imaginaries from a multiplicity of disciplinary perspectives Rather than invoking oft repeated narratives of Cold War rivalry and an escalating Space Race **Limiting Outer Space** breaks new ground by exploring a hitherto underrated and understudied decade the Post Apollo period Where Minds and Matters Meet Volker Janssen (Historian),2012 The American West where such landmarks as the Golden Gate Bridge rival wild landscapes in popularity and iconic significance has been viewed as a frontier of technological innovation **Where Minds and Matters Meet** calls attention to the convergence of Western history and the history of technology showing that the region s politics and culture have shaped seemingly placeless global technological practices and institutions Drawing on political and social history as well as art history the book s essays take the cultural measure of the region s great technological milestones including San Diego s Panama California Exposition the building of the Hetch Hetchy Dam in the Sierras and traffic planning in Los Angeles Contributors Amy Bix Louise Nelson Dyble Patrick McCray Linda Nash Peter Neushul Matthew W Roth Bruce Sinclair L Chase Smith Carlene Stephens Aristotle Tympas Jason Weems Peter Westwick Stephanie Young **Journal of the British Interplanetary Society** ,2003 **BLUEPRINT FOR SPACE** PB Ben Bova,1992-01-17 A history of flights from the imagination of ancient cave pictographs to the Apollo 11 moon landing Our Future in Space Steven Anzovin,1991 A compilation of articles essays and addresses **The Case for Mars** ,1987 *The Case for Mars III* Carol R. Stoker,1989

Science-fiction Studies , **Choice** ,1987 *Science and Technology Series* ,1972 **Technohistory** Chris Hables Gray,1996 The relationship between humans and technologies is incredibly complex and significant as the eleven fascinating case studies in this volume demonstrate Various historiographical approaches are used to illuminate such different topics as the movie colorization controversy public debates over nuclear waste teaching writing the story of water power on the Sugar River in New Hampshire the changes high technology has made in the nursing profession cyborgs the psychosociological

significance of electrification and cyberspace manifestos as technology the role of history in NASA policy making and the relationship between toy making and the civil rights movement All the essays are readable and enlightening They were collected to show how central the history of technology is in many fields and to seduce the readers into their own explorations The book includes an introduction by the noted historian Carroll Pursell an afterword by the editor and a bibliography of technohistory Space Policy Nathan C. Goldman,1992 Affect directly the lives of everyone for all time to come Goldman believes it essential that we all help determine its direction **Societies in Space** Alvin Rudoff,1996 The major purpose of Societies in Space is to encourage the involvement of the Social Sciences in the construction of the High Frontier Such an enterprise involves elements like the social construction of space settlements orbiting communities and the search for extraterrestrial intelligence This incipient subject matter should offer a challenging and exotic environment for direct Social Science participation Constructing America at the Peripheries James A. Spiller,1999 **Breakout Into Space** George Henry Elias,1990 Presents a case for moving civilization beyond earth s limits and into the solar system Here the author explores the environmental economic and political benefits of space settlement
