Seventh Millennium The Evidence That We Can Know The Future:

The Seventh Millennium John Ashton, 1998 For thousands of years humans have wondered about the future often looking for portents in the moon and stars or in other signs of nature Scientific studies have seemed to confirm that some people have the ability to see the future with varying degrees of accuracy This opens a whole new arena of human knowledge that affects our lives If the future exists do we really have freedom of choice Can we change it if we don't like certain aspects And can the prophecies for the next millennium provide the clues for pathways to our achieving the best future for ourselves and our children This work seeks to put together the fascinating puzzle of the future which suggests that our choices now affect what is going to happen

Evolution Impossible John Ashton, 2012-06-23 There is scientific evidence proving evolution cannot be responsible for life on Earth It is time to question what biology text books and nature documentaries claim about our origins Even Darwin admitted I threw out queries suggestions wondering all the time over everything and to my astonishment the ideas took like wildfire People made a religion of them Dr John Ashton has dedicated 40 years to teaching and researching science and exposing the lack of proven evidence for Darwin's theories In *Evolution Impossible* he uses discoveries in genetics biochemistry geology radiometric dating and other scientific disciplines to explain why the theory of evolution is a myth Discover for yourself Why the fossil record is evidence of extinction not evolution How erosion and sedimentation dates conflict with radiometric dating How the lack of transitional fossils undermines evolutionary notions Why living cells and new organisms do not rise by chance or random mutations Regardless of your level of scientific education you will finish this book able to cite 12 reasons why evolution cannot explain the origin of life **Australian**
