*Unsettled Issues Regarding Power Options for Decarbonized Commercial Vehicles* Jody Emlyn Muelaner, 2021-09-14 While direct electrification appears to provide the most cost effective route to decarbonization of commercial vehicles uptake may be constrained by critical metal supply Additionally it will be many years before hydrogen power becomes decarbonized or if it can ever compete economically with direct electrification An electric road system ERS could offer a highly efficient and cost effective route to direct electrification that would greatly reduce the volume of batteries required but pilot schemes are urgently needed to provide concrete data on operating costs for different ERS technologies Furthermore if plug in hybrid electric vehicles could obtain most of their power from an ERS liquid biofuels and electrofuels may prove useful for occasional off grid range extension To achieve extremely long range for operation in remote locations liquid fuels remain the only viable option
