**Handbook on New Paradigms in Smart Charging for E-Mobility** Abhishek Kumar, Ramesh C. Bansal, Praveen Kumar, Xiangning He, 2025-03-21 Handbook on New Paradigms in Smart Charging for E Mobility Global Trends Policies and Practices provides a complete package for understanding and developing smart chargers for e mobility applications It discusses various concepts required for developing charging infrastructure and usage of different kinds of storage technologies power electronics converters controllers communication requirements grid infrastructure sustainable technologies policy frameworks and all other related crucial aspects of E mobility Each part of the book covers a subdomain of e mobility beginning with an introductory chapter reviewing existing literature the subsequent chapters are arranged to each follow the previous one Other available books focus on specific technical subdomains of e mobility but none provides the wider outlook to meet the requirements of all audiences This book uniquely brings together topics that are not otherwise easily accessible or available to these audiences This book will be beneficial for engineers scientists and researchers providing them with a comprehensive standard benchmark work to explore the evolving aspects of charging infrastructure for e mobility Further it will also help policymakers practitioners and government entities formulate policies for successful implementations of e motility for their masses The techno socio economic focus will serve as standard literature for all Takes a modular approach with each module catering to a different sub domain of e mobility Includes standalone chapters that cover out of the box work related to e mobility Presents the latest advances and detailed technical descriptions of smart charging infrastructures

*Renewable Energy for Plug-In Electric Vehicles* Thanikanti Sudhakar Babu, Praveen Kumar Balachandran, Nnamdi Nwulu, 2024-07-04 Renewable Energy for Plug In Electric Vehicles Challenges Approaches and Solutions for Grid Integration provides a holistic guide to the critical technical challenges of integrating renewable energy for grid connected electric vehicles Considering the impact of renewable energy integration from a wide range of perspectives this book leverages its global range and expertise to cover problems from

power stability to market strategies fast charging and cybersecurity Practical solutions are provided incorporating the latest advances in technologies across meters sensors batteries storage demand response artificial intelligence and power system design Supporting broad understanding and practical solution development the book enables researchers students and industry professionals to take the next steps towards renewably sourced grid integrated electric vehicles Focuses on the essential step of integrating grid charging electric vehicles with renewable energy sources Provides comprehensive analysis of the challenge renewable integration presents for existing electric vehicle technologies Breaks down real world practical case studies and solutions using the latest advances by a global team of experts      *Proceedings of the 2025 International Conference on Financial Innovation and Marketing Management (FIMM 2025)* Maizaitulaidawati Md Husin,2025-12-02 This book is an open access Welcome to the 2025 International Conference on Financial Innovation and Marketing Management FIMM 2025 We are pleased to announce the 2025 International Conference on Financial Innovation and Marketing Management FIMM 2025 which will take place in the vibrant city of Singapore from August 15 17 2025 This prestigious event will bring together leading academics researchers and practitioners to explore cutting edge developments in the fields of financial innovation marketing strategies and their impact on the global economy FIMM 2025 will provide a platform for sharing knowledge discussing emerging trends and fostering collaborations that shape the future of finance and marketing management The conference will feature keynote speeches panel discussions technical sessions and networking opportunities designed to stimulate insightful exchanges and inspire new solutions to the challenges faced by today s financial and marketing sectors      **Optimized Energy Management Strategies for Electric Vehicles** Jain, Parita,Aggarwal, Puneet Kumar,Singh, Mandeep,Singh, Sushil Kumar,Rathore, Shailendra,2024-12-18 As electric vehicle EV usage increases worldwide optimized energy management strategies become crucial for EV efficiency range and performance These strategies cover a variety of techniques including advanced battery management systems smart charging solutions and real time energy consumption analytics all aimed at enhancing the driving experience while minimizing environmental impact By utilizing data driven insights and innovative technologies like machine learning and grid integration these strategies enable EVs to operate efficiently extend battery life and reduce charging costs Developing and implementing effective energy management strategies is essential for individual vehicle performance as well as the sustainable growth of electric mobility Optimized Energy Management Strategies for Electric Vehicles delves into the intricate landscape of energy management in electric vehicles EVs offering a comprehensive exploration of cutting edge methodologies and technologies From advanced algorithms to real time data analytics this book presents a rigorous examination of the most efficient and intelligent solutions for optimizing energy consumption and enhancing overall performance in EVs This book covers topics such as electrical engineering automotive engineering and sustainability and is a useful resource for automotive engineers electrical engineers policymakers urban planners business owners academicians scientists and researchers      **On the**

**Trail: Electric Vehicle Anxiety and Advice** Alan O'Hashi, 2022-08-01 On the Trail is a memoir recounting author Alan O'Hashi's experiences trekking thousands of miles around Wyoming in an electric vehicle (EV). If you're curious about EVs, he explains some about the different kinds of EVs in the marketplace but more about EV charging station subtleties like suggested locations for the three types of chargers, general details about battery efficiency, and the pitfalls drivers may encounter on short trips around town and longer drives over say 60 miles. One of his favorite books is *On the Road* 1957 by Jack Kerouac. It's a story about a personal journey and literal travel associated with freedom and unknown possibilities. The narrator and protagonist Sal Paradise, Kerouac's alter ego, was free to roam anywhere without being tied down to one place. The world moved slower back then. On the Trail is a reflection on O'Hashi's experience with the automobile over the years and how his life evolved along with his vehicle choices. He's not the first driver to embark on a long haul road trip in an EV, but his story recounts his pioneering spirit having to figure out how to keep moving forward. His sojourn certainly wasn't as arduous and rustic as it would have been in a covered wagon or a handcart. It wasn't a mountain range he had to get through or a raging river to ford. It was more like the time in 1903 when a medical doctor named H. Nelson Jackson, an auto mechanic, Sewall Crocker, and their dog Bud made a cross-country trip from California to New York in a Winton touring car. Their 63-day journey was difficult, slow, and expensive but proved that long haul road travel was possible. When the trio had car trouble, they sometimes had to stay at a location for several days waiting for parts to be delivered by train. Like the Jackson and Crocker trek, making the leap into an EV meant a significant lifestyle change for him, mostly around slowing down the pace of life. This account of three road trips equalling 2,600 miles around sparse Wyoming meant visiting new places and meeting others, including EV drivers and EV skeptics. One of Alan's favorite TV shows was *The Adventures of Superman*. It was the 1950s/1960s show starring George Reeves as the Man of Steel, who could leap tall buildings in a single bound and fought for truth, justice, and the American Way. Superman's American Way is the cultural tenet that refers to making it through life as rugged individuals; winning is better than losing, and acquiring more is better than having less. There isn't anything inherently wrong with Superman's American Way, but what if I reimagined it with more thoughtfulness and sensibility? If anything, EVs slow the world down. Maybe there'd be less road rage if traffic moved slower and drivers put less pressure on themselves to get from place to place. The automobile exemplifies the rugged individualistic attitude. One primary symbol of American success was and still is car ownership, with prestigious sounding names that speed down the road faster than the previous model and pickup trucks that conquer mountains no matter the terrain. After some basic research about EVs, he ended up impulse buying a 2021 Nissan Leaf SV Plus and took three trips around the sparsely populated state in the country, totaling approximately 2,600 miles/62kWh at a time.

**Public Acceptance of Green Growth and Decarbonization** Asta Mikalauskiene, Dalia Štreimikienė, Ignas Mikalauskas, 2025-09-02

This book explores the crucial role of public acceptance in advancing green growth, decarbonization, and rapid advancements of renewable energy technologies. It shows that public

acceptance is as critical as technological innovation given the significant infrastructure land use and behavioral changes required for a successful transition toward a carbon neutral society It provides theoretical frameworks tested in real life case studies from around the world The authors analyze the main drivers and barriers to technology adoption in conjunction with the central role of public acceptance This book also discusses the policies and measures needed to promote behavioral changes highlighting both successful strategies as well as failures Features Discusses all important topics surrounding public acceptance of renewable energy technologies Analyses and systematizes theoretical frameworks of public acceptance of renewable energy technologies Includes practical case studies to illustrate theoretical frameworks Presents inclusive policies and communication strategies that foster public acceptance of renewable energy technologies Provides empirical data from other studies and variations in acceptance across regions and demographic groups This is a comprehensive resource for professionals researchers graduate students economists policymakers in the energy industry and environmental management as well as for those interested in renewable energy usage and transition sustainable development and climate change mitigation

**Contemporary Solutions for Sustainable Transportation Practices** Munuhwa, Shakerod,2024-08-01 Transportation systems worldwide face two significant challenges environmental degradation and urban congestion The dominance of fossil fuel driven vehicles is leading to significant air pollution and greenhouse gas emissions As metropolitan areas expand rapidly traffic congestion longer commute times and infrastructure stress are rising Contemporary Solutions for Sustainable Transportation Practices provides a comprehensive roadmap for addressing these challenges The book advocates for a shift to eco conscious mobility solutions such as electric vehicles and intelligent transportation systems to create a greener and more efficient transportation future The book offers a multifaceted approach synthesizing existing research and knowledge on sustainable transportation It is a go to reference for academics researchers and practitioners providing expert insights case studies and real world examples By showcasing contemporary innovations and solutions it aims to inspire stakeholders and foster a culture of continuous improvement in the transportation sector The book also provides practical actionable guidance for implementing sustainable transportation solutions and equipping policymakers urban planners and industry leaders with the tools and knowledge to integrate eco friendly practices into their operations and decision making processes
