Privatization In Latin America New Roles For The Public And Private Sectors:

Privatization in Latin America Werner Baer, Melissa H. Birch, 1994-08-23 As import substitution industrialization yields to increasing market liberalization in Latin America in the 1990s privatization assigns new roles to both the public and private sectors After the decade of the debt crisis a much weakened State will reorient its policy efforts to the difficult issues of limited fiscal and monetary choices regulation of newly privatized firms and long postponed social programs However privatization represents a challenge for the private sector as much as it is an issue for the public sector Foreign and domestic capital will be asked to play a critical role in revitalizing battered economies New players from penny capitalists to pension funds and new institutions including dramatically altered banking systems and suddenly thriving stock markets have recently appeared The changing roles of public and private sectors and the implications of these developments are the focus of this book

The Privatization Challenge Pierre Guislain, 1997 analisa os aspectos legais e institucionais e apresenta uma lista com a legisla o sobre privatiza o em 112 paises

The Changing Role Of The State In Latin America Menno Vellinga, 1998 Since the 1930s the state has played a primary role in the development process of most Latin American countries and political systems have had strong corporatist and authoritarian centralist features In the last several years as that role has become increasingly incompatible with neoliberal reforms and the requirements of a transition to democracy state power has been significantly decentralized and the state has withdrawn from direct intervention in the economy This book examines the consequences of the redefinition of the state for processes of democratization and state civil society relations looking for example at transfers of power to local and regional authorities the role of NGOs and other interest groups in policymaking the emergence of new social movements and privatization and the introduction of market criteria Several country case studies are also included

Learning, Policy Making, and Market Reforms Covadonga Meseguer Yebra, 2009-03-30 In the 1980s and 1990s market reforms swept the world It is widely believed that the reformist wave can be partly explained in terms of the lessons learned from policy failures of the past Whereas this interpretation of events is well established it has never been empirically proved Learning and Market Reforms is the first study that tests the impact of policy learning on economic policy choices across time and space The study supports the popular explanation that on average governments around the world adopted privatization and trade liberalization and sustained open capital accounts as a result of learning from the experience of others

The Strategy of Structure Leslie Kathleen Williams, 1999 My dissertation has three main goals 1 to extend the literature on contracting to include an analytical treatment of the governance choices for newly privatized enterprises 2 to highlight the advantages that may accrue to governments and private investors by choosing one governance arrangement over another and 3 to perform an empirical analysis on privatized firms to examine the effect of the institutional environment

on the distribution of organizational forms across national boundaries The theory and empirical analysis is developed around the experiences with the privatization of telecommunication utilities in industrial developing and transition economies

Managing the Regulatory Process J. Luis Guasch, Pablo Tomas Spiller, 1999-01-01 developing countries complementing their far reaching privatization programs are engaged in deregulating various sectors of their economies and devising new regulatory frameworks for others particularly the utilities sectors As economies become more open pressures on countries to become more competitive drive the call for regulatory reform to reduce costs and foster increased productivity competitiveness and growth This report provides an overview of the costs and benefits of regulation throughout the world It provides case histories of regulation in different countries developed and developing and in various sectors such as transportation utilities and power It presents different strategies that were employed Furthermore it identifies lessons learned and lays the foundations for a best practice scenario for other countries to adopt While the challenges to regulatory reform are considerable so are the efforts that developing countries are making to face them These lessons when properly adapted to each country's own environment can significantly increase the likelihood of effective regulation **Emory International Law Review** ,2003 Roles for the Private Sector, Governments and Multilateral Creditors in Latin American Private Infrastructure Antonio Vives, 1996 *Possibilities and Realities of Cuba's Integration Into the Caribbean* ,1996 *Handbook of Latin American Studies* ,2000 Contains scholarly evaluations of books and book chapters as well as conference papers and articles published worldwide in the field of Latin American studies Covers social sciences and the humanities in alternate years *Social Sciences* Katherine D.
