Maternal & Child Health Nursing Adele Pillitteri, 2010 Growing research shows that many children from immigrant and refugee families are not doing well in school due in part to linguistic and cultural disadvantages Teaching dual language learners requires cultural sensitivity an understanding of language acquisition and intentional teaching strategies Combining research and techniques this resource helps early childhood educators support dual language learners as they develop the skills necessary for school readiness and success *Increased intracranial pressure in childhood* William E. Bell, William F. McCormick, 1978

Pediatric Critical Care Medicine Derek S. Wheeler, Hector R. Wong, Thomas P. Shanley, 2014-04-26 The second edition of Pediatric Critical Care Medicine spans three volumes with major sections dedicated to specific organ systems Each major section consists of separate chapters dedicated to reviewing the specific disease processes affecting each organ system Each chapter concludes with a comprehensive list of references with brief concise remarks denoting references of special interest and of interest

Consequently the books are unique in their comprehensive coverage of pediatric critical care and their ease of use and will be of value to those studying towards pediatric critical care examinations and those who are already qualified **Diseases of the Nervous System in Childhood** Jean Aicardi, 2009-03-16 This new edition is comprehensively updated whilst retaining both the popular problem solving approach and its familiar organisation and style Notable advances receive careful coverage from molecular genetics and imaging technology to new diseases and important treatment developments

Pediatric Neuro-Ophthalmology Michael C. Brodsky, 2010-03-23 Due to the generous representation of the afferent visual system within the brain neurological disease may disrupt vision as a presenting symptom or as a secondary effect of the disease Conversely early developmental disturbances of vision often disrupt ocular motor control systems giving rise to complex disorders such as nystagmus strabismus and torticollis The signs and symptoms of neurological disease are elusive by their very nature presenting a confounding diagnostic challenge Neurological medications and neurosurgical treatments can produce neuro ophthalmological dysfunction that can be difficult to distinguish from disease progression Affected patients may experience substantial delays in diagnosis and are often subjected to extensive and expensive diagnostic testing Scientific articles pertaining to specific disorders are scattered throughout medical subspecialty journals These children continue to fall through the cracks of our medical education system The increasing recognition that pediatric neuro ophthalmology comprises a distinct set of diseases from those seen in adults has led to its emergence as a dedicated field of study Since the original publication of Pediatric Neuro Ophthalmology nearly fourteen years ago interest in the field has burgeoned Pediatric ophthalmology and pediatric neurology subspecialty conferences often include symposia dedicated to recent advances in pediatric neuro ophthalmology Technical advances in neuroimaging have given rise to a more integrated mechanistic classification of neuro ophthalmological disease in children Our understanding of neurodevelopmental disorders of the visual system has expanded longstanding monoliths have been disassembled into component parts basic molecular mechanisms have taken center stage and genetic underpinnings have become definitional Evolutionary alterations can now be observed at the level of the gene adding a new dimension to our understanding of disease pathogenesis New classifications now encompass clinically disparate conditions Descriptive definitions have been supplanted by mechanistic ones and clinical definitions superseded by genetic ones Our concept of disease pathogenesis has been revised and in some cases overturned Bearing witness to these remarkable advancements has compelled me to enhance and expand the first edition of Pediatric Neuro Ophthalmology into this new and revised one In the first edition of this book our goal was to present the clinical characteristics diagnostic evaluation and therapeutic options for the common neuro ophthalmologic disorders of childhood In so doing we designed the book to provide a narrative journey through the thought processes involved in the clinical management of these disorders In this edition I have retained the basic narrative format of original book while expanding the exploration of these complex visual disorders in the context of the many new scientific advancements and discoveries that

have come to light These conditions are fun to diagnose fascinating to understand and gratifying to manage from the Preface to the 2nd Edition **Principles and Practice of Pediatric Neurosurgery** A. Leland Albright, P. David Adelson, Ian F. Pollack, 2008 This book presents the latest management techniques for pediatric neurosurgical disorders frequently encountered in clinical practice In this edition chapters are organized into separate sections including cerebral disorders spinal disorders neoplasms trauma cerebrovascular disease functional disorders and infectious disorders Each chapter describes the diagnostic studies pathology and pathobiology indications for surgery treatment alternatives prognostic factors and outcomes Features of the second edition Commentaries at the end of each chapter provide insights from the senior editors Pearls identify critical steps in management More than 850 high quality images demonstrate disease pathology and surgical approaches and techniques Easy to read tables synthesize key clinical concepts New chapters cover ethical issues in pediatric neurosurgery pediatric neurosurgery in developing countries and in utero neurosurgery This comprehensive book is a must have reference for all neurosurgeons and specialists and residents in pediatric neurosurgery and pediatric neurology

Pediatric Clinical Problem Solving Vincent A. Fulginiti, 1981 **Neurologic Emergencies in Infancy and Childhood** John M. Pellock, Edwin C.
