Processus Clinique En Education Specialisee:

Processus clinique en éducation spécialisée Michel Landry, Guy Lemire, 2013-04-11 T00:00:00-04:00 La profession d'educateur spécialisé est encore mal connue dans notre société. Chacun d'entre nous sait sans trop se tromper ce que fait l'infirmier ou le technicien en soins infirmiers mais il en va autrement lorsque l'on parle de l'educateur spécialisé un allié pourtant indispensable dans la prestation des services en santé mentale et en relations humaines. Le présent ouvrage fait le point sur les divers aspects du travail de l'educateur spécialisé tels que son rôle, ses fonctions, ses caractéristiques et son champ d'intervention. Il s'emploie ensuite à décrire dans un style clair et pragmatique comment l'educateur spécialisé intervient en fonction de la problématique rencontrée et de l'endroit où il est appelé à effectuer son travail. Chaque chapitre décrit une étape ou une partie d'une étape du processus clinique que ce soit avant, pendant ou après l'intervention pour aider le lecteur à bien saisir les liens et les enchaînements du processus. Dans cette nouvelle édition, plusieurs changements ont été apportés par rapport à la précédente. On retrouve une importante mise à jour des règlements et des lois québécoises et canadiennes qui influencent l'action de l'educateur spécialisé dont la loi 21 désormais incontournable dans le secteur des techniques humaines et de la santé mentale. Une plus grande attention est aussi accordée à l'intervention directe auprès des personnes en difficulté. Des approches d'intervention et d'activités d'intervention. Des précisions sont apportées aux quatre grandes familles d'approches d'intervention. Dans chaque famille, on présente de nouvelles techniques. Mentionnons titre d'exemples l'approche cognitive-comportementale, l'approche TEACCH, l'approche positive et l'approche motivationnelle. L'ouvrage comporte en outre de nombreuses caractéristiques pour faciliter les apprentissages telles que des résumés des exercices et des références bibliographiques. Enfin, des modèles d'outils cliniques regroupés en annexe et sur le Web en font un outil pédagogique des plus complets.

Processus clinique en éducation spécialisée Michel Landry, 1996-01-01 Ce manuel s'adresse tout d'abord à tout intervenant social qu'il soit éducateur spécialisé, travailleur social, animateur communautaire ou travailleur de rue. L'auteur présente le processus clinique étape par étape avant, pendant et après l'intervention. Il présente les taxinomies nécessaires à la définition des pathologies qui sont présentes chez les personnes en difficulté. Chaque chapitre du livre décrit une étape ou une partie d'une étape de l'intervention. Cette progression dans la présentation des contenus permet au lecteur de comprendre les liens et les enchaînements du processus clinique. Dans un style clair et pragmatique, l'auteur présente la planification, l'observation, la réalisation des objectifs, les techniques. Il ajoute son propos les formulaires et les grilles qui facilitent la réalisation et l'évaluation du processus. Un résumé de la matière des exercices et une bibliographie complètent chacun des chapitres.
