Readings in Qualitative Reasoning about Physical Systems describes the automated reasoning about the physical world using  
qualitative representations This text is divided into nine chapters each focusing on some aspect of qualitative physics The  
first chapter deal with qualitative physics which is concerned with representing and reasoning about the physical world The  
goal of qualitative physics is to capture both the commonsense knowledge of the person on the street and the tacit  
knowledge underlying the quantitative knowledge used by engineers and scientists The succeeding chapter discusses the  
qualitative calculus and its role in constructing an envisionment that includes behavior over both mythical time and elapsed  
time These topics are followed by reviews of the mathematical aspects of qualitative reasoning history based simulation and  
temporal reasoning as well as the intelligence in scientific computing The final chapters are devoted to automated modeling  
for qualitative reasoning and causal explanations of behavior These chapters also examine the qualitative kinematics of  
reasoning about shape and space This book will prove useful to psychologists and psychiatrists      *Publication Catalog of the*
