Data Mining with Decision Trees Lior Rokach,Oded Z. Maimon,2008 This is the first comprehensive book dedicated entirely to the field of decision trees in data mining and covers all aspects of this important technique Decision trees have become one of the most powerful and popular approaches in knowledge discovery and data mining the science and technology of exploring large and complex bodies of data in order to discover useful patterns The area is of great importance because it enables modeling and knowledge extraction from the abundance of data available Both theoreticians and practitioners are continually seeking techniques to make the process more efficient cost effective and accurate Decision trees originally implemented in decision theory and statistics are highly effective tools in other areas such as data mining text mining information extraction machine learning and pattern recognition This book invites readers to explore the many benefits in data mining that decision trees offer Self explanatory and easy to follow when compacted Able to handle a variety of input data nominal numeric and textual Able to process datasets that may have errors or missing values High predictive performance for a relatively small computational effort Available in many data mining packages over a variety of platforms Useful for various tasks such as classification regression clustering and feature selection *Pattern Classification Using Ensemble Methods* Lior Rokach,2010 Researchers from various disciplines such as pattern recognition statistics and machine learning have explored the use of ensemble methodology since the late seventies Thus they are faced with a wide variety of methods given the growing interest in the field This book aims to impose a degree of order upon this diversity by presenting a coherent and unified repository of ensemble methods theories trends challenges and applications The book describes in detail the classical methods as well as the extensions and novel approaches developed recently Along with algorithmic descriptions of each method it also explains the circumstances in which this method is applicable and the consequences and the trade offs incurred by using the method **Proceedings of the ACM Workshop on Survivable and Self-Regenerative Systems** ,2003 **Machine Learning** Claude Sammut,Achim Günther Hoffmann,Achim Hoffmann,2002 **Index of Conference Proceedings** British Library.
