Math Mammoth Grade 3-B Worktext, International Version Maria Miller,2025-03 Math Mammoth Grade 3 B Worktext International Version 2025 edition is the student book for the latter half of grade 3 and part of the Math Mammoth Grade 3 complete curriculum This book covers four digit numbers division measurement geometry and fractions The worktext contains both the necessary instruction and the problems thus a worktext and is fairly self teaching The curriculum meets and exceeds the Common Core standards Please note this is a student worktext and does not contain the answers The answer key book is available separately Features Math Mammoth focuses on conceptual understanding It explains the WHY so your children can understand the math not just learn HOW to do it Concepts are often explained with visual models followed by exercises using those models These visual models can take the place of manipulatives for many children however it is very easy to add corresponding manipulatives to the lessons if so desired The curriculum is mastery oriented This means it concentrates fairly

long on a topic delving into its various aspects This promotes conceptual understanding as opposed to spiral curricula that often tend to jump from topic to topic too much There is a strong emphasis on mental math and number sense It requires very little teacher preparation which is a big help to most parents The curriculum has no separate teacher s manual nor is it scripted The introduction to each chapter has some notes for the teacher concerning the material in the chapter All the instruction is written directly to the student in the worktext and there also exist accompanying videos where you can see Maria herself teach the material After each chapter introduction you will find a list of Internet links and resources games quizzes animations etc that can be used for fun illustrations and further practice For multiplication tables and division facts you can use our online practice program free
