Privatizing Nature Political Struggles For The Global Commons:

Privatizing Nature Michael Goldman, 1998 An easily read book illuminating the multifarious process of environmental degradation as well as the motley social movements especially on a grass root level resisting the privatisation of common resources and ecological degradation on both a local and global level Capital Class Tackling the key themes such as the convergence of environment and social justice global commodities and the role of social movements the contributors draw on examples from the Amazon Mexico Cameroon India and the industrialised North *Konfliktfeld Natur* Michael

Flitner, Christoph Görg, Volker Heins, 2013-03-09 In den Diskussionen um eine neue Weltordnung die Konsequenzen der wirtschaftlichen Globalisierung und neue soziale Konfliktfelder gewinnt der Streit um biologische Ressourcen zunehmend an Bedeutung Diese Ressourcen sind von beachtlichem Wert vor allem für diejenigen Industriezweige die neuerdings unter dem Stichwort Life Sciences und mit den Mitteln der modernen Biotechnologien die Bereiche Gesundheit und Ernährung als zentrale Investitionsfelder der Zukunft entdeckt haben Einrichtungen wie die Organisation für wirtschaftliche Zusammenarbeit und Entwicklung OECD oder das Umweltprogramm der Vereinten Nationen UNEP beschäftigen sich seit einigen Jahren ausgiebig mit der Berechnung des wirtschaftlichen Werts von Tropenwaldern Tierarten Blütenpflanzen unterschiedlichen Bodenkulturen und allen Arten von Gewässern In den zahlreichen Schriften zum Thema Biodiversität die von diesen Organisationen herausgegeben werden lässt sich beispielhaft verfolgen mit welcher Akribie Umweltkonomen den Wert des pflanzlichen Anteils moderner Medikamente des Züchtungsmaterials der Agrarforschung aber auch den Erholungswert von skandinavischen Elchjagdgründen in US Dollars auszudrücken versuchen Ironischerweise fällt diese spektakuläre wirtschaftliche Aufwertung in eine Zeit in der natürliche Lebensräume und Ressourcen nach allgemeiner Ansicht ökologisch bedroht sind wie nie zuvor Die in ihre Bestandteile zerlegte durchgerechnete und bewertete lebende Natur wird als ein knapper werdendes Kollektivgut wahrgenommen als populäres Ziel touristischer Aktivitäten und als Objekt skularisierter Andacht **Forests, Water and People in the Humid Tropics** M. Bonell, L. A. Bruijnzeel, 2004 Forests Water and People

in the Humid Tropics is the most comprehensive review available of the hydrological and physiological functioning of tropical rain forests the environmental impacts of their disturbance and conversion to other land uses and optimum strategies for managing them The book brings together leading specialists in such diverse fields as tropical anthropology and human geography environmental economics climatology and meteorology hydrology geomorphology plant and aquatic ecology forestry and conservation agronomy The editors have supplemented the individual contributions with invaluable overviews of the main sections and provide key pointers for future research Specialists will find authenticated detail in chapters written by experts on a whole range of people water land use issues managers and practitioners will learn more about the implications of ongoing and planned forest conversion while scientists and students will appreciate a unique review of the literature

Handbook of Global Environmental Politics Peter Dauvergne, 2012-01-01 The second edition of this Handbook

contains more than 30 new and original articles as well six essential updates by leading scholars of global environmental politics This landmark book maps the latest theoretical and empirical research in this energetic and growing field Captured here are the pioneering and lively debates over concerns for the health of the planet and how they might best be addressed The introduction explores the intellectual trends and evolving parameters in the field of global environmental politics It makes a case for an expansive definition of the field one that embraces an interdisciplinary literature on the connections between global politics and environmental change The remaining chapters are divided into four broad themes states and cooperation global governance the political economy of governance and knowledge and ethics with each section covering key emerging issues In depth explorations are given to topics such as climate change multinational corporations international agreements and UN organizations regulations and business standards trade and international finance multilevel and transnational governance and ecological citizenship Handbook of Global Environmental Politics Second Edition is a comprehensive review of the field and offers cutting edge ideas for further research As such scholars students and policymakers will find themselves looking to it for many years to come

A Companion to Environmental Geography
Noel Castree, David Demeritt, Diana Liverman, Bruce Rhoads, 2016-10-03 A Companion to Environmental Geography is the first book to comprehensively and systematically map the research frontier of human environment geography in an accessible and comprehensive way Cross cuts several areas of a discipline which has traditionally been seen as divided presenting work by human and physical geographers in the same volume Presents both the current state of the art research and charts future possibilities for the discipline Extends the term environmental geography beyond its traditional meanings to include new work on nature and environment by human and physical geographers not just hazards resources and conservation geographers Contains essays from an outstanding group of international contributors from among established scholars and rising stars in geography

International Regimes in China
Gianluca Ferraro, 2013-07-24 According to the Food and Agriculture Organization FAO of the United Nations more than 80% of world s fish stocks are fully exploited over exploited depleted or recovering from depletion Although several international agreements have promoted more responsible fisheries coastal states have usually maintained national policies that enable higher harvest levels rather than greater conservation of fish stocks and international agreements for more responsible fisheries have generally experienced a weak domestic implementation Among the major coastal fishing states China constitutes the largest fish producer and main exporter in the world and therefore presents a fascinating case study for the domestic implementation of international fisheries agreements This book investigates the degree to which China has complied with the international agreements it has signed and asks why it is failing to meet expectations Crucially it calls for greater emphasis on the political rather than technical issues involved in the implementation of international regimes In turn it examines how understanding the case of China can help us to develop solutions for improved international compliance in the future Providing an improved understanding of the implementation of

international regimes alongside an in depth study of China s political system policy making and compliance this book will be of great interest to students and scholars of Chinese studies international relations public policy and international law and environmental studies It will also be useful for policy makers working in the fields of environmental regulation and fisheries management

Realism Discourse and Deconstruction Jonathan Joseph, John Michael Roberts, 2004-05-05 Theories of discourse bring to realism new ideas about how knowledge develops and how representations of reality are influenced We gain an understanding of the conceptual aspect of social life and the processes by which meaning is produced This collection reflects the growing interest realist critics have shown towards forms of discourse theory and deconstruction The diverse range of contributions address such issues as the work of Derrida and deconstruction discourse theory Eurocentrism and poststructuralism What unites all of the contributions is a sense that it is essential to provide a realist alternative to the hitherto dominance of social constructionism hermeneutics and postmodernism over many of the issues discussed By developing a realist perspective the different authors attempt to embed discourse within the structured nature of the reality of the world Realism can situate language discourse and ideology within context specific or causally efficacious circumstances Realism can help to uncover issues of power representation and subjectivity and how discursive and other social practices produce real effects This can help us understand the manner in which non discursive social structures are reproduced through various forms of ideology and discourse And by knowing this we can start to address questions concerning human emancipation and how the world is to be transformed

Rural Resources and Local Livelihoods in Africa NA NA, 2016-09-27 Top scholars examine issues which lead readers to better understand environmental change in the African continent and its effects on rural African livelihoods Each of the studies in this book concerns four main issues conservation biodiversity and environment land use and livelihoods environmental change and policies for conservation and development The volume looks closely at the details of rural resource use access and control the social institutions which shape this and the effects on African environments It is not possible to understand livelihoods in Africa a central issue for all social and economic questions without grasping the interplay between environmental change and the sustainability of rural livelihoods The volume is groundbreaking in its detailed examination of this interplay and its importance in grasping the roots of poverty and potential for its alleviation and for its unique combination of natural and social science methods

Grassroots Struggles for Sustainability in Central America Lynn Horton, 2007 In recent years sustainable development has emerged as a central goal of the World Bank and grassroots activists alike In *Grassroots Struggles for Sustainability in Central America* Lynn R Horton explores the implications of this new often contested discourse and related policies for Central America s rural and indigenous poor Drawing on the testimony of leaders and residents of three communities in Nicaragua Costa Rica and Panama Horton explores grassroots assumptions values and practices of sustainable development and in

particular the ways in which they overlap with or challenge international financial institutions discourse of sustainability. With a comparative empirical approach Horton also analyzes dominant practices linked to sustainable development: neoliberal reforms, project interventions and environmental protection. She reveals how these practices support or undermine economic, cultural and political opportunities for the rural and indigenous poor and impact these communities' advancement of their own visions of sustainability. Finally, the author explores processes of empowerment that enable communities to articulate and put into practice local visions of sustainability which contribute toward broader social and structural transformations. *Grassroots Struggles for Sustainability in Central America* will interest sociologists, anthropologists and others who study the theory and practice of sustainable development. **Die geteilte Umwelt** Anita Engels, 2003
