Problems In Insurance Law:

Current Issues in Insurance Law, 1983 The Insurance Law Journal, 1898 Illegality in Marine Insurance Law Feng Wang, 2016-09-13 Illegality in Marine Insurance Law is the first book to deal specifically with illegality in the context of marine insurance law Previously this issue has only ever been partially covered within analysis and criticism of Section 41 of the Marine Insurance Act 1906 and warranties However Dr Wang Feng goes much further than this by considering its impact on the common law relevant to marine insurance in many jurisdictions worldwide The book addresses whether the existing law represents an accurate codification of the former authorities and whether Section 41 truly reflects existing legal principles As well as this the book examines how correctly to approach illegality within the context of marine insurance considering the fundamental changes to the rule of breach of warranty introduced by the Insurance Act 2015 Of interest to academic researchers and practitioners in common law and civil law jurisdictions this book provides rigorous analysis of the illegality issue and a conceptual approach for various approaches to reform marine insurance law It is a unique and comprehensive guide to illegality in marine insurance law **Data Profiling and Insurance Law** Brendan McGurk KC, 2019-03-21 The winner of the 2020 British Insurance Law Association Book Prize this timely expertly written book looks at the legal impact that the use of Big Data will have on the provision and substantive law of insurance Insurance companies are set to become some of the biggest consumers of big data which will enable them to profile prospective individual insureds at an increasingly granular level More particularly the book explores how i insurers gain access to information relevant to assessing risk and or the pricing of premiums ii the impact which that increased information will have on substantive insurance law and in particular duties of good faith disclosure and fair presentation of risk and iii the impact that insurers new knowledge may have on individual and group access to insurance This raises several consequential legal questions i To what extent is the use of big data analytics to profile risk compatible at least in the EU with the General Data Protection Regulation ii Does insurers ability to parse vast quantities of individual data about insureds invert the information asymmetry that has historically existed between insured and insurer such as to breathe life into insurers duty of good faith disclosure And iii by what means might legal challenges be brought against insurers both in relation to the use of big data and the consequences it may have on access to cover Written by a leading expert in the field this book will both stimulate further debate and operate as a reference text for academics and practitioners who are faced with emerging legal problems arising from the increasing opportunities that big data offers to the insurance industry *Private Law in the 21st Century* Kit Barker, Karen Fairweather, Ross Grantham, 2017-01-26 This book brings together a wide range of contributors from across the common law world to identify and debate the principal moral and systemic challenges facing private law in the remaining part of the twenty first century The various contributions identify serious problems relating to complexity and overload threats to research and education the law s unintelligibility the unsatisfactory nature of the law reform process and a general

lack of public engagement They consider the respective future roles of statutes codes and judge made law in the form of both common law and equitable rules They consider how best to organise the private law system internally and how to co ordinate it externally with other public and economic systems human rights regulation insurance markets and social security frameworks They address the challenges for private law presented by new forms of technology and by modern demands for the protection of new and intangible forms of moral interest such as interests in privacy vindication and personal choice They also engage with the critical contemporary debates about access to and the privatisation of civil justice The work is designed as a source of inspiration and reference for private lawyers as well as legislators policy makers and students **Commerce**
