Political Science and Chinese Political Studies Sujian Guo, 2012-07-25 We have witnessed the substantial transformation of China studies, particularly Chinese political studies, in the past 30 years due to changes in China and its rising status in the world, as well as changes in our ways of conducting research. As area studies specialists, we are no longer isolated from the larger disciplines of Political Science and International Relations (IR) but an integral part of them. This book contains theoretically innovative contributions by distinguished political scientists from inside and outside China who together offer up-to-date overviews of the state of the field of Chinese political studies. Combines empirical and normative researches as well as theoretical exploration and case studies. Explores the relationship between Western political science scholarship and contemporary Chinese political studies. Examines the logic and methods of political science and their scholarly application and most recent developments in the study of Chinese politics and discusses the hotly contested and debated issues in Chinese political studies such as universality and particularity, regularity and diversity, scientification and indigenization. Main problems, challenges, opportunities, and directions for the disciplinary and intellectual development of Chinese political studies in the context of rising China. **African American Perspectives on Political Science** Wilbur C.
