The Dig: Zoe and Zeus Audrey Hart,2011-11-11 Out of time and out of her element teenager Zoe Calder finds herself in ancient Greece battling against the power of the Olympians and the vengeance of a

scorned goddess all for the strange and mysterious boy she has come to love Zoe Calder has always been an outsider Stashed away in boarding schools since her parents died Zoe buries herself in the study of ancient worlds Her greatest thrill is spending her summers with her archeologist aunt and uncle on digs around the world And one day while investigating a newly unearthed temple in Crete Zoe discovers a luminous artifact that transports her to ancient Greece As Zoe quickly learns the Olympian Gods are real living people humans with mysterious powers Powers that Zoe quickly realizes she has come to possess as well However when the people of ancient Greece mistake Zoe for an Olympian the Gods must restore the balance of the ancient world No matter what **Science News** ,2007 *Dis/ability in Media, Law and History* Micky

Lee, Frank Rudy Cooper, Patricia Reeve, 2022-06-17 This book explores how being disabled originates in the physical world social representations and rules and historical power relations the interplay of which render bodies normal or not Do parking signs that represent people in wheelchairs as self propelling influence how we view dis ability How do wheelchair users understand their own bodies and an environment not built for them By asking questions like these the authors reveal how normalization has informed people s experiences of their bodies and their fight for substantive equality Understanding these processes requires acknowledging the tension between social construction and embodiment as well as centering the intersection of dis abilities with other identities such as race class gender sex orientation citizen status and so on Scholars and researchers will find that this book provides new avenues for thinking about dis ability A wider audience will find it accessible and informative **Techniques of Hearing** Michael Schillmeier, Robert Stock, Beate Ochsner, 2022-10-21

Hearing health and technologies are entangled in multi faceted ways This edited volume addresses this complex relationship by arguing that modern hearing was and is increasingly linked to and mediated by technological innovations By providing a set of original interdisciplinary investigations that shed new light on the history theory and practices of hearing techniques it is able to explore the heterogeneous entanglements of sound hearing practices technologies and health issues As the first book to bring together historians scholars from media studies social sciences cultural studies acoustics and neuroscientists the volume discusses modern technologies and their decisive impact on how normal hearing enhanced and smart hearing as well as hearing impairment have been configured It brings both new insights into the histories of hearing technologies as well as allowing us to better understand how enabling hearing technologies have currently been unfolding an increasingly hybrid ecology engaging smart hearing devices and offering stress free hearing and acoustic well being in novel auditory environments The volume will be of interest to all scholars and students of disability studies sound studies sociology of health and illness medical history health and society as well as those interested in the practices and techniques of self monitored and smart hearing **The Bloomsbury Handbook of the Anthropology of Sound** Holger Schulze, 2020-12-10 The Bloomsbury Handbook of the Anthropology of Sound presents the key subjects and approaches of anthropological research into sound cultures What are the common characteristics as well as the inconsistencies of living with and around sound in

everyday life This question drives research in this interdisciplinary area of sound studies it propels each main chapter of this handbook into a thoroughly different world of listening experiencing receiving sensing dreaming naming desiring and crafting sound This handbook is composed of six sections sonic artifacts sounds and the body habitat and sound sonic desires sounds and machines and overarching sensologies The individual chapters explore exemplary research objects and put them in the context of methodological approaches historical predecessors research practices and contemporary research gaps This volume offers therefore one of the broadest most detailed and instructive overviews on current research in this area of sensory anthropology

Capitalism, Power and Innovation Cecilia Rikap, 2021-03-29 In contemporary global capitalism the most powerful corporations are innovation or intellectual monopolies The book's unique perspective focuses on how private ownership and control of knowledge and data have become a major source of rent and power The author explains how at the one pole these corporations concentrate income property and power in the United States China and in a handful of intellectual monopolies particularly from digital and pharmaceutical industries while at the other pole developing countries are left further behind The book includes detailed empirical mappings of how intellectual monopolies develop and transform knowledge from universities and open source collaborations into intangible assets The result is a strategy that combines undermining the commons through privatization with harvesting from the same commons The book ends with provoking reflections to tilt the scale against intellectual monopoly capitalism and arguing that desired changes require democratic mobilization of workers and citizens at large This book represents one of the first attempts to capture the contours of an emerging new era where old perspectives lead us astray and the old policy toolbox is hopelessly inadequate This is true for the idea that the best or only way to promote innovation is to transform knowledge into private property It is also true for anti-trust policies focusing exclusively on consumer prices The formation of global infrastructures that lead to natural monopolies calls for public rather than private ownership Scholars and professionals from the social sciences and humanities in particular economics sociology political science geography educational science and science and technology studies will enjoy a clear and all embracing depiction of innovation dynamics in contemporary capitalism with a particular focus on asymmetries between actors regions and topics In fact its topical issue broadens the book's scope to those curious about how innovation networks shape our world *Popular Science*, 2008
