Energy Technology and Management Tauseef Aized, 2011-10-03 The civilization of present age is predominantly dependent on energy resources and their utilization Almost every human activity in today's life needs one or other form of energy As world's energy resources are not unlimited it is extremely important to use energy efficiently Both energy related technological issues and policy and planning paradigms are highly needed to effectively exploit and utilize energy resources This book covers topics ranging from technology to policy relevant to efficient energy utilization Those academic and practitioners who have background knowledge of energy issues can take benefit from this book

Graph Neural Networks: Essentials and Use Cases Pethuru Raj Chelliah, Pawan Whig, Susila Nagarajan, Usha Sakthivel, Nikhitha Yathiraju, 2025-07-25 This book explains the technologies and tools that underpin GNNs offering a clear and practical guide to their industrial applications and use cases AI engineers data scientists and researchers in AI and graph theory will find detailed insights into the latest trends and innovations driving this dynamic field With practical chapters demonstrating how GNNs are reshaping various industry verticals and how they complement advances in generative agentic and physical AI this book is an essential resource for understanding and leveraging their potential The neural network paradigm has surged in popularity for its ability to uncover hidden patterns within vast datasets This transformative technology has spurred global innovations particularly through the evolution of deep neural networks DNNs Convolutional neural networks CNNs have revolutionized computer vision while recurrent neural networks RNNs and their advanced variants have automated natural language processing tasks such as speech recognition translation and content generation Traditional DNNs primarily handle Euclidean data yet many real world problems involve non Euclidean data complex relationships and interactions naturally represented as graphs This challenge has driven the rise of graph neural networks GNNs an approach that extends deep learning into new domains GNNs are powerful models designed to work with graph structured data where nodes represent individual data points and edges denote the relationships between them Several variants have emerged Graph Convolutional Networks GCNs These networks learn from a node's local neighborhood by aggregating information from adjacent nodes updating the node's representation in the process Graph Attentional Networks GATs By incorporating attention mechanisms GATs focus on the most relevant neighbors during aggregation enhancing model performance Graph Recurrent Networks GRNs These networks combine principles from RNNs with graph structures to capture dynamic relationships within the data GNNs are applied in a variety of advanced use cases including node classification link prediction graph clustering anomaly detection recommendation systems and also in natural language processing and computer vision They help forecast traffic patterns analyze molecular structures verify programs predict social influence model electronic health records and map brain networks

Designing Interior Architecture Sylvia Leydecker, 2013-05-28 Designing interior spaces is a task that is equally relevant as architecture landscape architecture and urban design for those working professionally in the built environment In

this comprehensive work an international and interdisciplinary team of authors presents the essential aspects of the various fields of contemporary interior architecture and design The project examples are illustrated with brilliant photographs and plans They have been selected according to consistent criteria for all chapters of the book and represent the essential building types including exhibition stand design as well as a broad range of today s design approaches The authors place the collaboration between the various design disciplines at the center of focus The appendix contains information for further research All in all Designing Interior Architecture is a fundamental reference work for all those professionally engaged with the design

Interactive TV: A Shared Experience Pablo Cesar, Konstantinos Chorianopoulos, Jens F. Jensen, 2007-06-26 This book constitutes the refereed proceedings of the 5th European Conference on Interactive Television EuroITV 2007 held in Amsterdam The Netherlands May 2007 The volume covers a wide range of areas such as media studies audiovisual design multimedia HCI and management The papers are organized in topical sections on social TV systems user studies the future of TV social TV evaluation personalization and mobile TV

Introduction to Professional Policing Ian Pepper, Ruth McGrath, 2025-06-11 Policing is a dynamic profession with increasing demands and complexities placed upon police officers staff and volunteers who provide a 24 hour service across a diverse range of communities Written by experts in policing higher education from across both academic and professional practice this book equips aspiring or newly appointed police officers staff and volunteers with the knowledge and understanding to deal with the significant and often complex challenges they face daily This second edition of Introduction to Professional Policing explores a number of the core underpinning knowledge requirements identified as themes within the ever evolving National Policing Curriculum NPC and Police Constable Entry Routes PCER while also informing those embarking on leadership development These include Community and neighbourhood policing Counter terrorism Digital policing Ethics equality diversity and inclusion Evidence based policing Maintaining professional standards Police leadership Problem solving and problem oriented policing Victims and protecting the vulnerable Volunteers in policing This edition has been reviewed and significantly updated in line with the dynamic and ongoing demands faced by operational policing and therefore the associated knowledge requirements for policing education and training The book is refocused on the learning requirements contained within the range of entry routes now available in to policing as well as the professional development of those serving as police staff and volunteers This includes new chapters providing insights into community and neighbourhood policing problem solving and volunteers in policing At the end of each chapter the student finds a case study reflective questions and an extensive reference list all of which reinforces students knowledge and furthers their professional development Written in a clear and direct style this book supports aspiring police officers newly appointed police officers direct entry detectives community support officers special constables and police staff It will also be of interest to those embarking on a leadership journey within policing and anyone wanting to learn more about the profession of policing It is essential reading for students taking a professional policing
