Ken Woolley Ken Woolley, *Australian Architecture Now* Davina Jackson, Chris Johnson, 2000 Having just completed the most significant five year construction phase in the nation's history Australian architecture has moved into the world spotlight During the 1994-99 boom creative vigor was palpable confidence surged and the entire continent became endowed with a new sense of architectural independence Because it scans a diverse and momentary scene instead of recording a longer continuum of major achievements *Australian Architecture Now* is an unusual history book It presents two essays 21 case studies of outstanding public and domestic projects and in several brief chapters compares selected buildings according to similarities of either genre or style Close examination reveals surprising evidence that Australian architecture more often reflects the personal styles and attitudes of its creators than the poetic ideal of a unique sense of place Architects featured include Denton Corker Marshall Harry Seidler Gabriel Poole Rex Addison Peter Stutchbury Cox Sanderson Ness Nonda Katsalidis Sean Godsell Alexander Tzannes and more **Picturing Architecture** Desley Luscombe, Anne Peden, 1992 This book presents a range of graphic images used in the production of Australian architecture It pictures perspective axonometric and orthogonal images and each is examined for its specific aesthetic qualities and the techniques and materials used in the production of final artwork To clarify the distinctive characteristics of the graphic images each is accompanied by

a statement about the design written by the architect and where available photographs of the completed building The introductory text questions how the selected drawings might be seen to characterise a visibility of cultural production with regard to the present formation of our architectural profession This question opens two domains of analysis firstly the roles of the observer and artist architect in relation to the currency of visual codes and secondly the application to architectural production of visual codes from artistic media These domains of analysis issue further debate on the necessity of architectural drawing to fulfil the representational role of making comprehensible projected built form
