one problem with this beguiling vision of androgyny whatever we might like to believe as Dr Steven Rhoads shows sex
distinctions remain a deeply rooted part of human nature In Taking Sex Differences Seriously Rhoads assembles scientific
evidence demonstrating that these differences are hardwired into our biology They range from the subtle men get a chemical
high from winning while women get one from nursing to the profound women with high testosterone levels are more

with too many options If a woman has modeled her professional life on her father how can she envision herself as a mother
After spending so much of our lives dieting and working out how does contemplating pregnancy change the way we think
about our bodies What happens to our egalitarian marriages as we move from being partners to being parents The
generation now embarking upon motherhood is unique Many women have grown up in traditional homes yet take many
feminist beliefs for granted they have controlled their fertility for years before trying to conceive some feel supported in their
decisions to have children or not to have them and some do not They have high expectations for motherhood they have high
expectations for their lives apart from motherhood Today s women are venturing into new social economic and medical
terrain This is the first book to boldly examine the puzzling world of motherhood in the 1990s In this insightful lively
exploration of what motherhood means to today s women Judith D Schwartz articulates what many women are thinking but
not saying about having children In sharing many women s experiences thoughts hopes and desires she portrays a vision of
