James Taylor,2013-04-25 Should businessmen who commit fraud go to prison This question has been asked repeatedly since 2008 It was also raised in nineteenth century Britain when the spread of corporate capitalism created enormous new opportunities for dishonesty Historians have presented Victorian Britain as a haven for white collar criminals beneficiaries of

a prejudiced criminal justice system which only dealt harshly with offences by the poor Boardroom Scandal challenges these beliefs Based on an unparalleled sample of legal cases many examined here for the first time James Taylor presents a radical new interpretation of the relationship between capitalism and the law Initially there were no criminal sanctions against publishing false prospectuses concealing losses in balance sheets and even misappropriating company money But parliament became convinced of the need to criminalize these practices to protect the culture of stock market investment on which mid Victorian prosperity increasingly rested Persuading judges to play along was harder with many invoking the principle of caveat emptor to exonerate defendants But by the end of the century successful prosecutions of company executives were commonplace These trials performed multiple functions they stabilized confidence in times of crisis they dramatized the class blindness of the law and they were increasingly seen as essential as faith in a self regulating economy ebbed The criminalization of fraud therefore has far reaching implications for our understanding of nineteenth century Britain It also has relevance today in light of the on going economic crisis and the issues it raises regarding business ethics and the role of the state
