Physical Origins of Time Asymmetry J. J. Halliwell, J. Pérez-Mercader, W. H. Zurek, 1996-03-21 We say that the processes going on in the world about us are asymmetric in time or display an arrow of time Yet this manifest fact of our experience is particularly difficult to explain in terms of the fundamental laws of physics This volume reconciles these profoundly Physical Origins of Time Asymmetry J. Durham, Dean Rickles, 2016-12-09 In this essay collection leading physicists philosophers and historians attempt to fill the empty theoretical ground in the foundations of information and address the related question of the limits to our knowledge of the world Over recent decades our practical approach to information and its exploitation has radically outpaced our theoretical understanding to such a degree that reflection on the foundations may seem futile But it is exactly fields such as quantum information which are shifting the boundaries of the physically possible that make a foundational understanding of information increasingly important One of the recurring themes of the book is the claim by Eddington and Wheeler that information involves interaction and putting agents or observers centre stage Thus physical reality in their view is shaped by the questions we choose to put to it and is built up from the information residing at its core This is the root of Wheeler's famous phrase it from bit After reading the stimulating essays collected in this volume readers will be in a good position to From Complexity to Life Niels Henrik Gregersen, 2003 Annotation decide whether they agree with this view Contributors1 Introduction Towards an Emergentist Worldview Paul DaviesPART I DEFINING COMPLEXITY2 Randomness and Mathematical Proof Gregory J Chaitin 3 How to Define Complexity in Physics and Why Charles H Bennett PART II THE CONCEPT OF INFORMATION IN PHYSICS AND BIOLOGY4 The Emergence of Autonomous Agents Stuart Kauffman5 Complexity and the Arrow of Time Paul Davies 6Can Evolutionary Algorithms Generate Specified Complexity William A Dembski7 The Second Law of Gravutucs and the Fourth Law of Thermodynamics Ian Stewart8 Two Arros from a Mighty Bow
