Physiology and Behavior Therapy James G. Hollandsworth Jr., 2012-12-06 Despite the widespread use of psychophysiological concepts and methods in behavior therapy there is no text devoted specifically to the subject The publication of this book is necessary and timely and should promote a better appreciation of the physiological roots of behavior therapy The important connections between physiology and behavior therapy receive insufficient recognition nowadays despite the fact that historically one of the two main streams of behavior therapy grew out of a physiological basis Wolpe's early work was closely connected to physiology and in contemporary behavior therapy Lang's critical contribution is firmly based in psychophysiology The physiological component is prominent in Lang's highly productive three systems analysis of emotion and in its application to psychological disorders In addition there are

philosophical reasons for maintaining the close connection between behavior therapy and physiology The existence of these connections and their justification can raise few objections and it is therefore curious that a book on this significant subject has not appeared earlier The importance of physiology for behavior therapy can be illustrated by considering the nature of a behavior therapy deprived of its physiological connections It would survive certainly but as a rather scrawny uninteresting orphan among many clamorous competitors

Sensory Physiology and Behavior Rachel Galun, 1975-06-01 In a recent book Arthur Koestler describes very cynically the superfluity of scientific meetings He lists the various gatherings that are going to take place in one brief summer season in the Kongresshaus of a small Swiss village ending the long list with three interdisciplinary symposia titles of which contain the three words

Environment Pollution and Future in three different permutations By the same token Koestler could list endlessly meetings on sensory physiology and behaviour or their synonyms which have taken place all over the world on the national or international level in recent years The organizing committee of the Oholo conferences was very well aware of this situation when the topic for the 19th Conference was selected However this field is relatively new in Israel only in the last decade were several teams established in this country to carry out combined studies on sensory physiology and behaviour They attracted ever increasing numbers of students of zoology physiology medicine and psychology The committee thought that the time was ripe to bring the Israeli students and scientists together with noted investigators from all over the world to discuss and analyse the state of the art The Conference dealt with processing of information obtained through the various senses visual auditory tactile as well as the olfactory and gustatory senses More complex behavioural patterns were also analysed

Neurobiology of Food and Fluid Intake Edward M. Stricker, Stephen Woods, 2006-05-04 Like previous handbooks the present volume is an authoritative and up to date compendium of information and perspective on the neurobiology of ingestive behaviors It is intended to be stimulating and informative to the practitioner whether neophyte or senior scholar It is also intended to be accessible to others who do not investigate the biological bases of food and fluid ingestion who may teach aspects of this material or simply wonder about the current state of the field To all readers we present this handbook as a progress report recognizing that the present state of the field is much farther along than it was the last time a handbook was published but mindful of the likelihood that it is not as far along as it will be when the next handbook is prepared This field has witnessed a spectacular accretion of scientific information since the first handbook was published in 1967 During the generation of science between then and the publication of the second handbook in 1990 numerous scientific reports have substantially changed the perspective and informational base of the field
