**The Visual Grammar of Pablo Picasso** Enrique Mallén, 2003 Pablo Picasso's continued search for the essential features of perceived objects and his natural abidance to the general principles regulating artistic creation determined his intuitive analysis of the various stages of vision His exploration of pictorial language is reflected in the well established periods in the development of Cubism Progressively objects were analyzed first by their image or retinal and surface or external features as viewed from particular observer oriented viewpoints during the Pre Cubist and C zannian Cubist stages then by viewer independent structural features during Analytic Cubism and finally by categorial features during Synthetic Cubism This final re evaluation allowed the artist to treat pictorial language as truly arbitrary leading to metaphorical correlations between objects that went beyond what was actually depicted on the surface of the canvas Picasso's Concrete Sculptures Sally H. Fairweather, Pablo Picasso, 1982 Picasso's concrete sculptures When Pablo Picasso first learned of the Betograde Process for pouring and engraving concrete he jumped out of his chair as if he had sat on a pin He was so excited His lightning eye and intuitive intelligence instantly recognized the creative uses that he might be able to make of this new technique Indeed Picasso's collaboration with Norwegian artist Carl Nesjar during the next fifteen years led to a series of exuberant public sculptures in Spain France Sweden Norway Holland Israel and the United States New York Princeton Cambridge and Rolling Meadows near Chicago Picasso's Concrete Sculptures is a comprehensive history of that collaboration from the preparation and selection of maquettes through all the stages of approval to actual construction and engraving Author Sally Fairweather is a prominent Chicago art dealer who was instrumental in the realization there of the monumental Picasso concrete sculpture The Bather and she subsequently undertook the prodigious task of researching and writing this first published study of the entire series of sculptures Nearly 100 plates many in full color illustrate every one of these majestic works in its final setting as well as showing the maquettes on which they were based the photographs signed by Picasso to document his approval step by step shots of construction in progress and more This volume also includes a bibliography and index and a fully documented catalogue raisonne of all the Picasso Nesjar works in concrete including some not yet erected Picasso's Concrete Sculptures is an indispensable addition to the literature on this greatest of modern masters filling an important gap in his knowledge of his oeuvre Front flap **Picasso's Paintings, Watercolors, Drawings**
