Mergers, Acquisitions, and Other Restructuring Activities Donald DePamphilis, 2019-09-04 *Mergers Acquisitions and Other Restructuring Activities: An Integrated Approach to Process, Tools, Cases, and Solutions Tenth Edition* is the most comprehensive and cutting-edge text available on the subject. Supported by recent peer-reviewed academic research, this book provides many recent notable deals, precedent-setting judicial decisions, government policies and regulations, and trends affecting MAs as well as takeover strategies and tactics. Today's policies, politics, and economics are reflected in the book's 40 case studies, 90% of which involve deals either announced or completed during the last several years. These cases represent friendly, hostile, highly leveraged, and cross-border transactions in ten different industries involving public and private firms and those experiencing financial distress. Sections discuss an overview of MAs, key regulations, common strategies and tactics, how managers may choose a business strategy from available options, valuation methods, and basic financial modeling techniques: the negotiating process, how deal structuring and financing are inextricably linked, how consensus is reached during the bargaining process, the role of financial models in closing the deal, and strategic growth options as alternatives to domestic MAs. Provides a rigorous discussion of the strengths and limitations of financial modeling as applied to MA and how these models can be applied in various areas. Includes new academic research and updated revised case studies. Presents updated MA tactics and strategies along with court cases and new regulations governing business combinations, valuation methodologies, and financing.
