*Ludicrous* Edward Niedermeyer,2019-08-20 Tesla is the most exciting car company in a generation but can it live up to the hype Tesla Motors and CEO Elon Musk have become household names shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom The company's market valuation now rivals that of long established automakers and to many industry observers Tesla is defining the future of the industry But behind the hype Tesla has some serious deficiencies that raise questions about its sky high valuation and even its ultimate survival Tesla's commitment to innovation has led it to reject the careful zero defects approach of other car manufacturers even as it struggles to mass produce cars reliably and with minimal defects While most car manufacturers struggle with the razor thin margins of mid priced sedans Tesla's strategy requires that the Model 3 finally bring it to profitability even as the high priced Roadster and Model S both lost money And Tesla's approach of continually focusing on the future even as commitments and deadlines are repeatedly missed may ultimately test the patience of all but its most devoted fans In *Ludicrous* journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day to day realities of the company and the cars it produces Blending original reporting and never before published insider accounts with savvy industry analysis Niedermeyer tells the story of Tesla as it's never been told before with clear eyes objectivity and insight

What's Killing America Jason Rantz,2023-09-26 A stunning book about how America's biggest cities are being destroyed by progressive policies and woke Democrats Many Americans have no idea how badly our largest Democrat run cities have deteriorated We've been complacent for far too long assuming that the craziest elements of the radical Left would stay confined to the East and West coasts But crime drug addiction homelessness left wing school indoctrination so called inclusive housing policies and outrageous taxes don't stay within the big city limits of places like Los Angeles Chicago Portland New York Seattle and San Francisco The effects of ideologically driven left wing policies always spread which should alarm Americans regardless of their political leanings Jason Rantz is a prominent radio host a trusted journalist and a frequent Fox News guest unafraid to go directly into the action He's grown a national following by breaking news the mainstream media won't cover the consequences of destructive leftist policies wherever they occur He was right there for the chaos in his hometown of Seattle when liberal anarchists declared an autonomous police free CHOP Zone He infiltrates the Antifa marches and knows firsthand how those radicals operate This is the shocking story of what he's learned Employing on the ground reporting and fact based analysis Rantz zooms out to conduct a fascinating detailed data driven study of how these liberal policies result in chaos misery and too often bloodshed He skillfully recounts the tragic events with a narrative reporter's eye for detail to tell the true story of what's happening in America's cities

*Climate of Contempt* David Spence,2024-08-06 Why is the United States struggling to enact policies to reduce carbon emissions Conventional wisdom holds that the wealthy and powerful are to blame as the oligarchs and corporations that wield disproportionate sway over politicians prioritize their short term financial interests over the climate s long term health David B Spence argues that this top down narrative misses a more important culprit with critical consequences for the energy transition *Climate of Contempt* offers a voter centric bottom up explanation of national climate and energy politics one that pinpoints bitter partisanship as the key impediment to transitioning to a net zero carbon future Members of Congress respond to voters whose animosity

toward the opposing party makes compromise politically risky The most powerful driver of polarization in turn is the mixture of ideology and social media that constitutes today's information environment which amplifies anger spreads half truths and falsehoods and sows division distorting voters understandings of the energy transition and their fellow citizens Spence explores the effects of polarization partisanship and propaganda on energy policy and considers how to build a broader climate coalition He contends that cooperation on this crucial issue is still possible but it will require sustained person to person engagement across ideological and partisan boundaries to foster a more productive dialogue Providing a timely and incisive understanding of the politics of the energy transition *Climate of Contempt* suggests new paths forward and offers hope for a net zero future
