Fall Clearance 2025

O García

Fall Clearance 2025:

TBG2025 ABM, Asia Bike Media ABM TBG2025 *Report* United States. Interstate Commerce Commission, 1971-05-11

Railroad Accident Investigation , The Anti-Personnel Mine Ban Convention Stuart Casey-Maslen, 2023-11-03

In September 1997 the Anti Personnel Mine Ban Convention APMBC was adopted by UN Member States at a dedicated diplomatic conference in Oslo A disarmament treaty with clear and expansive humanitarian aims the APMBC represented the culmination of many years of energetic campaigning The Convention has since garnered the support of over 160 States Parties yet some of its core provisions remain under scrutiny Stuart Casey Maslen s article by article commentary on the 1997 Anti Personnel Mine Ban Convention addresses international law and State practice on anti personnel mines in the first twenty five years of the lifetime of this disarmament treaty It builds upon the author s first commentary on the Convention published by Oxford University Press in 2003 and the revised edition issued in 2005 Whereas the two earlier editions focused on the negotiating history of the APMBC this new edition provides insight into State and treaty practice up to now It comprehensively details the use of anti personnel mines through to the present day the destruction of landmine stockpiles and mine clearance in every affected nation An authoritative and current commentary on the Anti Personnel Mine Ban Convention this new edition will be a crucial asset for diplomats international lawyers and academics seeking to interpret this instrumental piece of disarmament law

Sustainable Technology Development Paul Weaver, Leo Jansen, Geert van Grootveld, Egbert van Spiegel, Philip Vergragt, 2017-09-08 In the time it takes to read this sentence about fifteen people will be added to the world s population Read the sentence again and there will be thirty Tomorrow each of these people will be demanding greater prosperity Production and consumption are increasing fast but will have to grow even faster in the future to keep up with population growth and a world increasingly divided by inequality How should we react to these trends Certainly many use growth figures to forecast disaster But there is an alternative vision one of a sustainable future in which growth is seen not as a threat but as the driving force behind innovation This is the scenario worked out in the Netherlands by Sustainable Technology Development STD a five year programme of research and learning by doing based on setting up new innovation networks and working with new methods to search for sustainable technological solutions In order to make sustainability tangible STD made a leap in time What human needs will have to be satisfied fifty years from now Taking a sustainable future vision as a starting point STD demonstrated what steps we should take today for new technologies and systems to be in place in time These results are now available for the first time in a comprehensive specifically written English language book together with a description of the unique working method of STD and the results and key lessons from a set of the programme s illustrative case studies This book serves as a manual for industry governments and social leaders wanting to prepare themselves for a sustainable future Sustainable Technology Development sets out the programme s underpinning philosophy and describes its approach methods and findings Delivering sustainability means finding ways to

meet human needs using a fraction of the natural resources we use today The world s richer nations would be wise to target at least ten fold improvements by 2050 in the productivity with which conventional natural resources and environmental services are used And they need to bring new sustainable resources on stream to augment the resource base and replace the use of unsustainable alternatives Sustainable Technology Development marks a significant contribution to our understanding of innovation processes and how these might be influenced in favour of sustainable technology development In principle technology could play a pivotal role in sustainable development Whether it does or not depends on whether innovators can be encouraged to make this an explicit goal adopt long term time horizons and search for renewable technologies Given the long lead times involved there is no time to waste in beginning the search The STD programme has begun to make inroads into one of the most urgent of all needs concerning sustainable development that for innovation in the innovation process itself
