Dyslexia and Stress Thomas Richard Miles, 2004-01-26 Though a good deal is known about the remediation of dyslexics of all ages there is growing awareness among teachers and others that there is much more to their work than teaching literacy skills. Most of us experience stress at some point in our lives but experience suggests that dyslexics are particularly vulnerable to it. This book presents documented evidence on the subject. The second edition has been substantially rewritten and contains contributions from both dyslexics and non-dyslexics. Many of the contributors to the first edition have substantially rewritten their original chapters. Among the new contributors are Morag Kiziewicz herself dyslexic and a learning support manager at the University of Bath, Michael Lea a professional musician and Julian Cox who in the editor's view was unjustly convicted of murder by the courts when the whole event leading to this was a tragic accident brought about by his disabilities. All describe the ways in which dyslexia has influenced their lives. There are also chapters by Lindsay Peer who writes from her standpoint as education officer of the British Dyslexia Association and Melanie Jameson who is advisor to the Adult Dyslexia organization and speaks of the way dyslexics' stresses in the lawcourts sometimes lead to serious miscarriages of justice.
