Rankings and the Reshaping of Higher Education Ellen Hazelkorn, 2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation. The College Completion Glass—Half-Full or Half-Empty? Tiffany Beth Mfume, 2018-12-21 Despite the Great Recession and looming student loan debt crisis, college education remains the most proven invaluable lifetime investment and serves as the most reliable path to upward mobility and socioeconomic class reassignment. Mfume suggests that the value added of even one year of college can be transformative. As higher education professionals and partners continue to advocate for new and improved college retention and graduation measures, The College Completion Glass Half-Full or Half-Empty: Exploring the Value of Postsecondary Education presents a new paradigm for higher education, one that focuses on the value added of postsecondary education as well as on student success beyond the traditional measure of college graduation rates: a model which merges conventional practices and supports for students with non-traditional partnerships with and advocacy from successful non-completers.

Evaluating and Responding to College Guidebooks and Rankings R. Dan Walleri, Marsha K. Moss, 1995-12-27 The proliferation of college guidebooks and reputational rankings has become of increasing concern to many in the higher education community. Public relations and admissions staff view such publications from a marketing perspective and the potential positive or negative consequences for enrollment. College presidents share these concerns along with the broader implications for the overall stature of their institutions. The validity and integrity of the information reported is of particular interest to those who work in the area of institutional research. Acknowledging the fact that the public, the consumers, has a great need for information about different institutions in order to make informed college choices for themselves or their children, all of these groups in higher education share alarm about the burden imposed on institutions in responding to the ever-increasing number of publishers requesting information for these guidebooks and rankings. This volume explores some of the major facets of and issues surrounding college guidebooks and ratings. The background and development of these publications are traced followed by discussion of major issues and perspectives: consumer use of the publications, validity of ratings and the institutional burden of supplying the needed information. Views from both the institutions and the publishers are presented. This is the 88th issue of the quarterly journal *New Directions for Institutional Research*. For more information on the series, please see the Journals and Periodicals page.
